## Projects

2025/02	<b>E-COMMERCE WEB APPLICATION TESTING</b> As part of my SDET course, I worked on testing a web-based e-commerce application to ensure its reliability and functional accuracy. I performed both manual and automation testing of key modules, including user login, product search, cart management, and payment gateway integration. I created detailed test cases, executed them across multiple browsers, and logged defects.
2024/03	<b>GYM MANAGEMENT SYSTEM.</b> The Gym Management System (GMS) is a comprehensive software solution designed to enhance the efficiency and effectiveness of managing a gym or fitness center. It incorporates various features to streamline operations, improve member experience, and increase overall profitability.
2024/08	<b>ONLINE SHOPPING SYSTEM</b> In developing the mini project for an online shopping system, I played a key role in the design and functionality of the platform. I created the frontend layout using HTML and CSS, ensuring an intuitive and visually appealing interface. I implemented PHP scripts for backend processing, managing user sessions and handling item listings. Using MySQL, I designed and connected the database to store and retrieve product, user, and order details. Finally, I configured XAMPP to host and test the system locally, ensuring smooth integration and troubleshooting any issues
