Projects

Meal Finder

09/2024 – 11/2024

- Designed and developed a responsive single-page meal search application using JavaScript and TheMealDB API, improving load speed and user interaction.
- Dynamic user interactions were implemented, with modular code for a seamless and professional user experience using modern JavaScript and Tailwind CSS.

Adaptive UI Theme with Modern CSS

06/2024 – 08/2024

- Created a fully responsive and visually appealing UI using the latest CSS properties, including variables (:root), Flexbox layout, smooth transitions, hover interactions, and more.
- Implemented dark/light theme support along with enhanced accessibility by optimizing color schemes, font rendering, and media queries to provide the best experience on all kinds of devices and for all user preferences.

Villa Finder Web Application

03/2024 – 05/2024

- Designed a responsive real-estate web application using HTML, CSS, Bootstrap that helped users search villas by location and price, and made improvements in UI accessibility and loading efficiency.
- Collaborated using Git & GitHub following modular development and clean code principles.

Certificates

- Certified on Java Basics in CodeChef
- Certified on DSA in Smart Interviews
- Participated in coding fest in college
