## SUMMARY

Experienced **Software Developer** with 2.6+ years of expertise in **Java, Spring Boot, and Microservices**. Proven ability to build **scalable backend systems**, develop **RESTful APIs**, and integrate **AWS cloud services**. Skilled in **performance optimization**, and **CI/CD automation** using **Jenkins** and **Docker**. Strong collaborator with focus on **clean code, system reliability**, and delivering **business-driven solutions**.

## SKILLS

Java 8, Java 17, Spring MVC, Spring Boot, Spring Security, Hibernate, JPA, REST APIs, Maven, Microservices, JWT, OAuth2, Design Patterns, SOLID Principles, JavaScript, React.js, MySQL, PostgreSQL, MongoDB, Docker, Jenkins, Git, Postman, Swagger, SonarQube, Kafka, JUnit, Mockito, AWS (EC2, ECS, EKS, RDS, CloudWatch)

## ROLES & RESPONSIBILITIES

- Gathered and analyzed **system requirements** to enhance business efficiency.
- Followed **Agile methodology**, participating in **sprint planning and execution**.
- Designed and implemented features using **Java, Spring Boot, Hibernate, and React**.
- Developed and integrated **RESTful APIs** and modular **microservices** for system management.
- Implemented **Kafka-based APIs** for asynchronous communication and integrated **Redis caching** to improve response efficiency.
- Conducted **code reviews** and fixed **SonarQube** violations to maintain code quality.
- Performed **API testing** with **Postman** and collaborated closely with **QA teams**.
- Leveraged **CI/CD pipelines** using **Jenkins** for automated deployment and delivery.
- Exposure with **AWS services (EC2, RDS, Beanstalk, CloudWatch, EKS)** for scalability and monitoring.
- Optimized **SQL queries** and enhanced **system performance** in microservice-based applications.
- Performed **bug fixes** and **system optimization** ensuring stable application releases.

## EXPERIENCE

### Sigma Software Solutions, Pune

Mar 2023 – Present

*Software Developer*

#### InvenLogic - Inventory Platform

*Java 17, Spring Boot, Hibernate, MySQL, Microservices, Kafka*

A centralized inventory management system automating supply chain and stock control operations. Features real-time stock monitoring with automated reordering via Kafka event-driven architecture. Includes supplier management portal with performance tracking and alert systems. Provides analytics dashboards for stock movement and inventory optimization.

#### FinAccel - Digital Lending Platform

*Java 17, Spring Boot, Hibernate, PostgreSQL, Microservices*

A cloud-native loan management system handling complete loan lifecycle from disbursement to repayment. Supports multiple loan products with configurable repayment schedules and automated payment processing. Includes borrower portal for payment tracking and financial reporting. Features real-time notification system for payment reminders and transaction alerts.

#### ClaimEase - Insurance Claims System

*Java 17, Spring Boot, PostgreSQL, React, Postman*

An end-to-end claims processing platform for insurance providers handling claim submission to settlement. Supports document upload and verification with automated validation checks. Includes role-based workflow management for adjusters and approvers. Provides real-time claim status tracking and reporting dashboard for auditors.

## EDUCATION

### Centre for Development of Advanced Computing (CDAC)

Sep 2022 – Mar 2023

*Post Graduate Diploma in Advanced Computing*

### Savitribai Phule Pune University (SPPU)

Aug 2017 – Nov 2020

*Bachelor of Engineering in Mechanical*

*Pune, Maharashtra*
