## SUMMARY

---

A recent graduate in Computer Science with a proven ability to develop user-friendly software applications. Passionate about problem-solving and collaborating in team environments to achieve project goals. Seeking an opportunity as a Software Developer to contribute to innovative solutions while enhancing my technical and coding skills.

## SKILL

---

- **Programming Languages:** C, C++, Core Java, HTML, CSS, JavaScript, SQL And Oracle .
- **Frameworks :** Spring Boot, Spring MVC, Hibernate, JPA.
- **Tools & Platforms:** Git ,GitHub ,Maven , Postman , JUnit testing ,Eclipse ,IntelliJ IDE.
- **Other Skills:**
  - Problem-solving.
  - Adaptability.
  - Eagerness to learn new technologies.

## PROJECTS:

---

- **Major Project:**
  - **Self-Driving AI Robot Car Using Arduino Uno**  
Developed a self-driving AI robot car using Arduino Uno, integrating obstacle detection, line following, and mobile app control via MIT App Inventor And Arduino IDE.
- **Other Projects :**
  - **Library Management System (Spring Boot)**  
Built a Library Management System using Spring Boot to manage Books, Authors, and Librarians. Implemented CRUD operations for book details , author details , and librarian details . Designed and exposed REST APIs for managing books, author catalog, and librarian records.
  - **Employee Wage Builder (developed in java)**  
Developed an Employee Wage Builder program in Java to calculate monthly wages based on attendance, working hours, and employment type using object-oriented principles.

## EDUCATION

---

### Bachelor of Computer Engineering

D.N. Patel College of Engineering, Shahada.

Dr. Babasaheb Ambedkar Technological University, Maharashtra.

2020 – 2024
