## JOB ROLE

As a UI/UX Designer's role is to design digital products that are both visually appealing and easy to use. I focus on understanding user needs, creating wireframes and prototypes, and developing intuitive interfaces that enhance the overall user experience. By combining creativity with functionality, a UI/UX Designer ensures that websites, mobile apps, and software are user-friendly, accessible, and aligned with business goals.

## JOB RESPONSIBILITIES

I conduct user research and client requirements to understand the business and users needs. I Design responsive user interfaces for web and mobile platforms using Figma, Adobe XD. I Create user flows, wireframes, mockups, and interactive prototypes to visualize the product experience. Design admin dashboards, landing pages, e-commerce platforms, and mobile app for diverse industries. Create visual assets like icons, banners, brochures, and social media creatives using Adobe Illustrator and Photoshop.
