SUMMARY

A detail-oriented Data Analyst holding an **MBA in Business Analysis**, providing a strong foundation for analytical leadership. Possesses **hands-on experience** utilizing core tools like **SQL-Server**, **Python**, and **Advanced Excel** for data cleaning and exploration. Expert in creating impactful data visualizations and interactive dashboards using **Power BI** to support informed business decision-making.

PROJECTS

- ❖ **SQL Project:**
Title:
Advanced Sales Insights using SQL Queries
Description:
Analysed sales data using SQL to uncover trends and KPIs. Used aggregate, ranking, and CTE queries to identify top customers, profitable products, and high-revenue cities. Delivered insights on revenue, category performance, and customer behaviour to guide business strategy.
- ❖ **Power BI Project:**
Title:
Bank Customer Insights Dashboard in Power BI
Description:
Developed an interactive Power BI dashboard to analysed bank customer data by region, gender, and age. Created visuals for total balance, job category, and demographics. Helped identify high-value customers, regional performance, and patterns in customer financial behaviour.
- ❖ **Python Project**
Title:
Cricket T20WC 2024 Data Analysis using Python
Description:
Developed a Python-based data analysis project on T20 World Cup 2024 datasets. Used Pandas, NumPy, and Matplotlib for data cleaning, exploration, and visualization. Analysed team scores, player averages, and win probabilities. Generated performance insights and visual reports to support data-driven sports analysis.
