TECHNICAL SKILLS

Programming Languages: Python, SQL, DAX

Databases: MySQL, PostgreSQL, Snowflake

Data Visualization: Microsoft Power BI, Tableau, Matplotlib, Seaborn

Libraries: Pandas, NumPy, Scikit-learn

Other Skills: ETL, AWS, Azure, Data Analytics, Business Intelligence, Dashboard Development, KPI Reporting, Problem-Solving, Decision-Making, Agile, Data Storytelling

EXPERIENCE

Ace Research

Remote

Data Analyst

Mar 2025 – Present

- Engineered and optimized complex **SQL queries** for data extraction, cleaning, and aggregation, reducing **report generation time by 35%**.
- Designed and maintained **10+ dynamic Excel dashboards** and **standardized reporting formats**, enabling **real-time insights** and reducing analyst onboarding time by **25%**.
- Automated data validation and transformation using **advanced Excel functions, macros, and SQL-driven workflows**, saving **20+ hours/month** in manual effort.
- Led routine **data audits** with custom **SQL scripts** to detect inconsistencies and enhance **data integrity** across multi-source datasets.
- Collaborated with cross-functional teams to resolve data issues and drive automation, ensuring **report accuracy** and improving operational efficiency.

PROJECTS

Adventure Works Sales Data Visualization | *PostgreSQL, Power BI*

- Built an interactive Power BI dashboard** by integrating 7 datasets using **ETL, data modeling, and relationship management**, analyzing **\$24.9M revenue** and **\$10.5M profit** with **3.31% monthly growth**.
- Optimized operations** by analyzing **60.6K transactions**, implementing **DAX measures, Power Query transformations, and row-level security**, identifying a **1.01% return rate**.

Spotify Data Analytics and Consumer Insights | *PostgreSQL, MS Excel*

- Designed a **normalized relational database**, reducing **data redundancy by 30%** while ensuring **data integrity and efficiency**.
- Processed and analyzed **50,000+ records** using **SQL queries**, achieving **100% data accuracy** through validation techniques.
- Conducted **trend analysis** on consumer behavior, providing insights into **emerging music genres** to enhance user experience and engagement.

CERTIFICATIONS

Microsoft Power BI Desktop for Business Intelligence
