OBJECTIVE

Computer Science undergraduate with hands-on experience in web development. Comfortable with JavaScript, React, and backend fundamentals. Looking for an entry-level role to learn, contribute, and grow in a structured team environment.

SKILLS AND INTERESTS

Programming Languages	C++, JavaScript
Framework and Libraries	React.js, Node.js, HTML, CSS, REST API
Database	MongoDB
Tools	Git, GitHub
Soft Skills	Critical thinking

EDUCATION

Swami Vivekananda Institute Of Science And Technology
B Tech in Computer Science And Engineering

Dec 2021 - June 2025
CGPA – 7.8

PROJECTS

MindScribe - Blog Publishing Platform

- Used **serverless architecture** to optimize backend, reducing API response time and server costs.
- Secure JWT authentication, **hashing 100% of user passwords** and reducing unauthorized access.
- Integrated PostgreSQL to reduce data inconsistencies and improve query performance.
- GitHub Link- <https://github.com/abhirupPann/mindscribe.git>
- Live Link - <https://mindscribe-one.vercel.app/>

Consult Ease – Doctor Consulting Platform (SaaS)

- Built a full-stack doctor consulting platform enabling users to book appointments, consult doctors, and manage profiles through a secure authentication system.
- Integrated Razorpay for online payments, supporting secure transaction handling for appointment bookings.
- Implemented **AI-based doctor suggestions** by integrating an external API to recommend doctors based on user-entered symptoms.
