

Yogesh Aher

.NET DEVELOPER

Pune | (+91) 8308387323 | aheryogesh1510@gmail.com | [LinkedIn](#)

PROFILE

Experienced software developer with 3+ years of expertise in the full software development lifecycle. Proficient in .NET technologies, specializing in backend development, API integration, and performance optimization. Skilled in troubleshooting, defect resolution, and mentoring junior developers to enhance team efficiency. Passionate about delivering scalable, high-quality solutions that drive business success. Seeking to leverage technical expertise and problem-solving skills in a dynamic development environment.

SKILLS

- **Language :** C#, JavaScript, HTML, CSS
- **Framework and Tools :** .NET Core, ASP.NET MVC, Web API, LINQ, React
- **Databases & ORM :** SQL Server, MySQL, MongoDB, Dapper, EF Core
- **API & Architecture:** REST APIs, Swagger, Microservices, Clean Architecture
- **CI/CD & Cloud:** Git, GitHub, Azure DevOps, Azure App Services & Azure SQL
- **Testing & Code Quality:** xUnit, NUnit, Moq, SOLID principles, Dependency Injection
- **Monitoring & DevOps:** Serilog, Azure Monitor, Docker, Agile/Scrum

PROFESSIONAL EXPERIENCE

Infosys Limited [Feb 2022 – Present]

Senior System Engineer

- Designed and developed scalable applications using **ASP.NET MVC** and **ASP.NET Core** in a **microservices-oriented** architecture.
- Built and optimized **RESTful APIs** with asynchronous processing, third-party integrations, validation, and consistent API contract handling.
- Managed Azure SQL Database using **Dapper** and the Repository pattern, improving data access performance and simplifying CRUD operations.
- Worked across multiple microservices, ensuring standardized logging, exception handling, API versioning, and inter-service communication.
- Implemented secure authentication and authorization using JWT, OAuth2, and Identity Server with proper token validation flows.
- Integrated Azure services including Azure Functions, Azure Key Vault, Azure App Service, Azure Storage, and Application Insights for monitoring and secure configuration.
- Streamlined backend-to-frontend communication using C#/.NET, ensuring smooth data flow between UI and server-side components.
- Led Git version control practices such as feature branching, pull requests, conflict resolution, and code quality reviews.
- Created technical design documents, architecture diagrams, impact assessments, and change request documentation.
- Collaborated with clients and cross-functional teams to gather business requirements, clarify use cases, and proactively resolve issues.

System Engineer

- Debugged and troubleshoot issues in .NET MVC applications, identifying and resolving performance bottlenecks.
- Specialized in SQL Server development, including stored procedures, user-defined functions, views, and triggers.
- Experienced in JavaScript for building interactive and dynamic web applications, with experience in React for frontend development and API integration
- Provided production support by analyzing logs, identifying defects, and resolving issues within SLAs.
- Participated in daily standups, sprint reviews cycles, and deployment support activities.

CERTIFICATIONS

- **Microsoft Certified : Azure Fundamentals Certification** – ([Credly Link](#))

EDUCATION

Bachelor of Engineering – Mechanical Engineering

Pravara Rural Engineering College Loni

July 2021
