## PROFILE SUMMARY

---

A passionate and motivated individual with a strong background in Computer Science. Proficient in fundamental technologies such as Python, SQL, HTML, CSS, and partial knowledge of JavaScript, with a growing interest in integrating open-source and AI-based tools into applications. Capable of independent or collaborative work, eager to learn new tools, frameworks, and methodologies to create improved user experiences. Enthusiastic about contributing to next-generation platforms used globally, with hands-on experience in application development and automation.

## EDUCATION

---

**Bachelor of Science (B.Sc.) in Computer Science**  
Holy Mary College, Osmania University

May 2025  
CGPA: 7.61/10

## PROJECTS

---

### Text Classification on Twitter Data

- Developed a text classification model to categorize tweets based on sentiment (positive, negative, neutral) or topics (e.g., sports, politics, entertainment).
- Extracted, preprocessed, and analyzed Twitter data using machine learning techniques and NLP tools to predict sentiment and improve model accuracy.

### TravelX Web Application

- Designed and developed a responsive travel web portal enabling users to explore destinations, packages, and reviews.
- Implemented smooth navigation, interactive UI, and a search engine for quick access to key travel sections using HTML, CSS, Bootstrap, and MySQL.

## TECHNICAL SKILLS

---

<b>Technologies</b>	HTML, CSS, Python, JavaScript (Basic)
<b>Frameworks</b>	Bootstrap
<b>Databases</b>	SQL, MySQL
<b>Tools</b>	Git, GitHub, Visual Studio Code
<b>Other Skills</b>	MS Office, Windows

## SOFT SKILLS

---

- Communication Skills
- Problem Solving and Time Management
- Collaboration and Teamwork
- Adaptability and Multi-Tasking
- Analytical and Logical Thinking
