## CAREER OBJECTIVE

To obtain a challenging position as a Java Full Stack Developer in a reputed organization where I can apply my knowledge of Java, Spring Boot, and React to build real-world applications, while continuously learning new technologies and contributing to the growth of the company.

## TECHNICAL SKILLS

**Programming Languages:** Java, SQL, HTML, CSS, JavaScript, JDBC

**Frameworks / Tools:** Spring Boot, React.js, Node.js

**Database:** MySQL

**Web Development:** Full Stack (Frontend + Backend)

**Version Control:** Git, GitHub

**Soft Skills:** Problem Solving, Communication, Teamwork, Quick Learner

## PROJECTS

### E-Commerce Web Application (React)

Designed a responsive Single Page Application using React with product categories like Veg, Non-Veg, Milk, and Chocolate. Implemented cart management, checkout, and persistent data storage using localStorage/Redux. Integrated EmailJS for order confirmation and generated downloadable QR code receipts. Built an admin panel to manage products (add/edit/delete) with form validation and image upload.

**Tech Stack:** React, JavaScript (ES6+), React Router, EmailJS, qrcode.react, CSS, Framer Motion

### Multi-Disease Prediction using Machine Learning

Developed an ML model to predict multiple diseases based on health dataset analysis and model training. Focused on improving prediction accuracy using data preprocessing techniques.

**Tools:** Python, Pandas, Scikit-learn

### Community Service Project

Worked with a team of 10 for 2 months on a local digital-awareness project. Helped develop simple web tools for community services and record management.

## INTERNSHIP

### Web Development Intern – 3 Months

Created and optimized responsive web pages using HTML, CSS, and JavaScript. Learned front-end design principles, debugging, and code versioning with Git.
