

# SUMIT

## Full Stack Developer

Java Full Stack Developer with **3.5 years** of experience proficient in end-to-end software development

---

📞 7503372336 • 📧 [sumitgond9999@gmail.com](mailto:sumitgond9999@gmail.com) • [in](#) LinkedIn • [GitHub](#) • Portfolio • Ghaziabad, Uttar Pradesh, India

---

### WORK EXPERIENCE ( 3.5 YEAR )

---

#### Wipro Limited

Project Engineer(Java Developer) | Greater Noida

Mar 2022 - Jan 2025

#### Hotfoot Technology Solutions

Java Developer | Noida

May 2025 - Dec 2025

---

### PROJECTS

---

#### Java Backend Developer | Purple Finance :

- Purple Finance provides secured, small-ticket loans to micro and small enterprises (MSMEs) for business expansion, asset purchase, renovation, and working capital.
- Designed and developed high-performance RESTful APIs using Java, Spring Boot, and MySQL for the internal lending platform, streamlining end-to-end loan processing and enabling efficient management of client deals and capital partner networks.
- Improved API performance and system reliability by implementing caching strategies, global exception handling, and advanced logging/monitoring, reducing response times by ~30% and enhancing system resilience under high load.
- Collaborated with cross-functional teams (Product, QA, and Operations) during SIT, UAT, and production deployment cycles, ensuring smooth releases and minimal downtime in a highly regulated NBFC environment.

#### Java Backend Developer | United Health Group :

- Engineered a scalable CRM platform via Spring Boot, accommodating 1000+ users with role-based access control (RBAC) and token-based authentication; slashed unauthorized access incidents by 25%, exceeding security benchmarks.
- Implemented JWT-based authentication with Spring Security, enhancing access control and reducing security vulnerabilities by 30%. Safeguarded sensitive data through encryption and secure token storage, ensuring compliance with industry standards.
- Integrated MySQL as the primary database, optimizing data storage and retrieval while ensuring high availability and robust data management for seamless operations.
- Developed a modular architecture, creating multiple independent modules with well-structured REST APIs to support core functionalities.
- Leveraged Spring Data JPA to streamline database interactions, simplifying CRUD operations and enhancing query efficiency, reducing development time by 20%.
- Integrated AWS S3 for secure file storage, ensuring scalability, reliability, and efficient handling of large amounts of uploaded content.
- Enforced robust data validation mechanisms, ensuring 100% data integrity, consistency, and security across all modules, reducing data-related errors by 40%.
- Performed thorough testing, including functional, integration, regression, and security checks, to ensure the system is reliable, performs well, and meets security standards.

- Optimized application efficiency by implementing best practices for API design, database query optimization, and security enhancements, improving overall performance and reducing response times by 20%.

### **Java Full Stack Developer | ShareNoteBook :**

- Developed and maintained ShareNoteBook, a cross-device note-sharing platform, using ReactJS (front-end) and Spring Boot (back-end), ensuring high performance and seamless functionality for 10,000+ users.
- Conducted comprehensive testing of new features, identifying and resolving 50+ bugs to maintain system stability and deliver high-quality results.
- Debugged critical API issues using detailed logs and diagnostic tools, resolving 95% of production and pre-production bugs within SLA timelines.
- Designed and executed test cases for functional, integration, and regression testing, achieving 98% test coverage and ensuring stable releases.
- Optimized deployment processes, collaborating with DevOps and QA teams to reduce release bottlenecks and cut deployment times by 30%.
- Enhanced system performance by identifying bottlenecks, optimizing backend logic, and implementing robust solutions, improving response times by 25%.
- Automated recurring test scenarios and deployment validation, reducing manual effort by 40% and streamlining testing processes.
- Followed Agile methodology, actively contributing to sprint planning, reviews, and retrospectives, improving workflow efficiency and delivering incremental improvements on time.

## **TECH STACK**

---

### **BACKEND SKILLS**

- Core Java & JavaEE (OOPs, Collections, Multi-Threading, Stream API, Lambda, Functional Interfaces)
- Spring & Spring Boot (Spring Core, Spring MVC, Spring Data JPA, Spring Rest, Spring Security, Spring Web)
- Monolithic Architecture, Microservice Architecture
- Hibernate, MySql, JDBC
- Linux

### **FRONTEND SKILLS**

- HTML, CSS, JavaScript and ReactJS

### **OTHER SKILLS**

- Linux, Shell Scripting, Putty, WinSCP, Clean Code, SOLID Principle & Design Patterns, Git & GitHub, Docker, Apache Kafka, Avro Schema, Postman, Swagger, AWS(EC2, S3, RDS).
- Unit Test, JUnit, Mockito, Sonar, Jenkins, Debugging, Problem Solving.

## **Highest Education**

---

### **Bachelor Of Technology**

RD Engineering College | Duhai, Ghaziabad

Aug 2017 - Aug 2021
