Projects

Retail Sales Management System

[Link](#)

- Designed an MSSQL database for retail sales, managing 500 customers, 100 products, and 10,000+ orders. Implemented automated data generation, a stored procedure, view, and index. Created 13 queries for sales trends, customer behavior, and inventory management. Documented on GitHub.
- Skills: MSSQL, Database Design, Query Optimization, Stored Procedures, Views, Indexing

Healthcare Appointment System

[Link](#)

- Developed a MySQL database for healthcare management, handling 500 patients, 50 doctors, 10 clinics, and 10,000+ appointments. Implemented automated data generation, a stored procedure, view, trigger, and index. Created 12 queries for insights like overdue appointments and clinic priorities. Documented on GitHub with ERD and outputs, showcasing scalability and analysis.
- Skills: MySQL, Database Design, Query Optimization, Stored Procedures, Views, Triggers, Indexing
