Airoli, Navi Mumbai, Maharashtra - 400708, India

## OBJECTIVE

Java Full Stack Developer with expertise in Java, Spring Boot, Angular, and cloud technologies. Skilled in building scalable web applications and contributing across the full software development lifecycle, from design to deployment and production support. Strong problem-solver, eager to drive innovation and deliver user-focused solutions.

## SKILLS

- **Backend:** Java, Spring Boot, Spring Batch, Hibernate/JPA, RESTful APIs, Microservices, Spring MVC, JDBC
- **Frontend:** Angular, TypeScript, JavaScript, jQuery, HTML, CSS, Bootstrap, Ag-Grid
- **Database Systems:** Oracle SQL, MySQL, MongoDB
- **DevOps & Cloud:** Jenkins, Git, GitHub, Docker, AWS (EC2, S3), GCP (Cloud Storage, BigQuery)
- **Messaging & Caching:** Apache Kafka, RabbitMQ, Redis
- **Testing & Project Tools:** JUnit, Mockito, Postman, Swagger, Jira

## EXPERIENCE

- **Capgemini** 07/2023 - Present  
*Senior Analyst* Navi Mumbai, India

### 1. Digital Entertainment Exchange (SaaS Product)

- Led end-to-end design and development of 10+ user interfaces in an Agile environment, enhancing user experience and streamlining workflows for global film distributors.
- Designed and implemented robust API interfaces and Spring Batch jobs for efficient data transfer and processing, ensuring seamless integration, enhanced communication between system components, and improved data flow efficiency.
- Managed Oracle SQL operations, including complex queries, tuning, and ensuring data integrity.
- Integrated Redis for distributed caching, reducing API response time by 25%.
- Leveraged Apache Kafka for asynchronous messaging between microservices, enabling real-time data flow.
- Participated in CI/CD setup using Jenkins, automating testing, builds, and deployments, and reducing deployment time by 40%.
- Actively involved in production deployments, ensuring smooth releases with minimal downtime.
- Mentored team members, resolving technical doubts and ensuring timely, successful task delivery.
- Led client demos, incorporating feedback to enhance features and align with user needs.

### 2. Data Migration for Enterprise Client

- Developed Spring Batch jobs for large-scale migration from legacy systems to cloud architecture.
- Utilized GCP (Cloud Storage, BigQuery) for high-volume data ingestion and transformation.
- Automated data migration workflows using cron-based scheduling, ensuring daily execution with no data loss and minimal manual intervention.
- Performed Oracle SQL-based validation and reconciliation post-migration.

- **Capgemini** 03/2023 - 05/2023  
*Java Full Stack Developer Intern* Navi Mumbai, India

- Built full-stack applications using Spring Boot (microservices) and Angular, covering design to deployment.
- Developed a Flight Management System with user management, ticketing, and scheduling features.
- Applied JUnit for testing and GitHub for version control.

## EDUCATION

- **JSPM's Rajarshi Shahu College of Engineering** 07/2020 - 06/2023  
*Bachelor's of Technology* Pune, India  
\* CGPA: 08.90/10.00
- **Government Polytechnic** 07/2017 - 06/2020  
*Diploma in Electrical Engineering* Chh. SambhajiNagar, India  
\* Percentage: 94.83%

## CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Certified Java Practitioner
