CAREER OBJECTIVE

- Motivated MCA graduate with strong technical skills in Salesforce development, Java programming, and CRM automation. Seeking an entry-level Salesforce Developer role to apply hands-on experience with Apex, LWC, and Salesforce Admin configurations. Committed to delivering scalable solutions, improving business processes, and contributing effectively to development teams.

TECHNICAL SKILLS

- Programming: C, Java, Apex, Lightning Web Components (LWC)
- Salesforce Admin: Objects, Fields, Validation Rules, Workflows, Profiles, Roles, Permission Sets
- Database: SQL
- Web Technologies: HTML, CSS, JavaScript
- Tools: VS Code, IntelliJ IDEA, Eclipse, Salesforce Developer Console
- Version Control: Git

PROJECTS

Tangerine – Salesforce CRM Practice

- Configured Salesforce Objects, Fields, Validation Rules, and Workflows.
- Practiced CRM automation and customer management process improvements.
- Supported UI changes, sandbox testing, and debugging activities.
- Gained exposure to deployment processes in Salesforce.

Student Online Quiz System (Java, MySQL)

- Developed a GUI-based quiz system using Java.
- Implemented automated scoring and dynamic question display.
- Integrated MySQL database for authentication and question storage.
- Added validation and result generation logic.

EXPERIENCE

Salesforce Developer Trainee – Abhayram IT Solutions

- Hands-on experience with Salesforce Objects, Fields, Validation Rules, and Workflows.
- Developed Apex Classes, Triggers, and SOQL queries.
- Built simple Lightning Web Components for UI enhancement.

- Worked on CRM automation and business process improvements.

Product Support – HSN Software Technologies, Hyderabad

- Provided support for DSC Pack software including installation and troubleshooting.
- Guided customers on product usage and feature understanding.
- Reported technical bugs for timely resolution.
- Enhanced customer satisfaction through quick issue handling.
