Projects

TextUtils App

- *TextUtils is a ReactJs website built primarily to do various operations on regular typed text.*
- *TextUtils can convert your text to any case in just one simple click of a button.*
- *It does a detailed analyzing of your text, and provides an output of words, and characters, along with reading time as well.*

Technologies Used :- REACT.JS, HTML/CSS, BOOTSTRAP, JAVASCRIPT

Project link :- [link](#)

News App

- *News App is a sleek and responsive web application designed to provide users with the latest and most relevant news articles from various sources worldwide.*
- *Built using the power of **React.js** for a dynamic front-end experience, **Node.js** for a robust back-end, and integrated **APIs** to fetch real-time data, News App ensures that users stay updated on current events anytime, anywhere.*
- *In this News App you can easily filter news by categories like technology, business, entertainment, sports, health, and more, so users can focus on what interests them.*

Technologies Used :- REACT.JS, NODE.JS, APIs, HTML/CSS, BOOTSTRAP, JAVASCRIPT

CRUD Todo App

- **Add Tasks:** *Allows users to add new tasks with a title and description.*
- **Edit Tasks:** *Users can modify existing tasks to update details or change deadlines.*
- **Delete Tasks:** *Provides the option to remove tasks that are no longer needed.*

Technologies Used :- HTML/CSS, JAVASCRIPT

Project link :- [link](#)

iNoteBook

- *iNotebook is a powerful and user-friendly note-taking app that allows users to securely create, organize, and manage notes all in one place. Built using the MERN stack (MongoDB, Express, React.js, and Node.js).*
- **Secure User Authentication:** *Uses JWT (JSON Web Token) authentication to protect user*

data, ensuring that each user's notes are private and accessible only to them.

- **Real-Time Note Management:** *Add, edit, delete, and update notes instantly, with real-time syncing, so your notes are always up-to-date.*
- **Cloud Storage with MongoDB:** *All notes are stored securely in MongoDB, ensuring scalability and reliable data storage.*

Technologies Used :- REACT.JS, NODE.JS, EXPRESS.JS, MONGODB, HTML/CSS, BOOTSTRAP, JAVASCRIPT

Decimal To Binary Converter

- *This is a decimal to binary converter in which you can convert any integer number into binary.*

Technologies Used :- HTML, CSS and JavaScript

Project link :- [link](#)

Palindrome Ckecker

- *A palindrome checker app is a useful tool designed to determine if a given word, phrase, or sequence of characters reads the same backward as forward.*
- *Allows users to input single words, phrases, or sentences.*

Technologies Used :- HTML, CSS and JavaScript

Project link :- [link](#)

Responsive Saloon Website

- *A salon website is a digital platform designed to showcase and promote the services, expertise, and ambiance of a beauty salon or hair salon. It serves as an online destination where potential clients can learn more about the salon.*
- *The website should be mobile-friendly and optimized for viewing on various devices, including smartphones, tablets, and desktop computers.*

Technologies Used :- HTML, CSS and JavaScript
