PROJECTS

1. Way 2 Cars

- A Spring Boot Enterprise Application Developed to Simplify the car rental process.
- The main goal of this project is to ensure that customers don't need to physically visit the car rental office to book a car, Through this online platform, customers can search, book, and manage car rentals easily from anywhere using the Way 2 Cars website. This makes the entire car booking process fast, digital, and convenient

2. Simple Banking System (Spring Boot, Java, MySQL)

GitHubLink  : <https://github.com/VikramGoud25/Simple-Banking-System.git>

- Developed a banking application with customer/admin modules.
- Implemented MVC architecture, Spring Data JPA, validations, and exception handling to ensure secure.
- Separate access for admin and customers.
- Used object-oriented programming principles to manage customer data, account operations, and transaction.
