Profile

Results-driven QA Engineer with 4.5+ years of experience in Automation, API, and Database Testing. Skilled in Selenium with Python for test automation, with hands-on experience writing automation scripts for functional and regression testing. Proficient in test planning, execution, defect tracking, and working in Agile environments. Strong in analyzing requirements, creating test scenarios, and improving test coverage through automation. Quick learner with strong problem-solving skills and a keen interest in expanding automation capabilities.

Skills

API Testing Postman, Rest Assured	● ● ● ● ●	Database MY SQL, SQL Server	● ● ● ● ●
Test Management Tools JIRA, Backlog, Bugzilla	● ● ● ● ●	Automation Selenium with python	● ● ● ● ●
Testing Type Manual Testing, API Testing, Database Testing	● ● ● ● ●		

Professional Experience

QA Engineer <i>Roinet Solutions</i>	07/2023 – present Gurugram
<ul style="list-style-type: none">Performed automation testing using Selenium with Python, including writing scripts for functional and regression scenarios.Validated application behaviour by executing automation scripts and analysing logs, reports, and failures.Identified elements using Selenium WebDriver locators and created reusable methods to improve script stability.Designed, developed, and executed manual test cases to ensure the quality and functionality of web applications.Conducted API testing using Postman to validate payloads, status codes, headers, and response time.Created and managed test collections in Postman, used environment variables, and built pre-request scripts.Performed database testing by writing SQL queries to verify data integrity and accuracy. Collaborated with developers, business analysts, and stakeholders to clarify requirements and resolve defects.Used JIRA for bug tracking and test case management, ensuring complete defect lifecycle tracking.Participated in Agile ceremonies such as sprint planning, stand-ups, and retrospectives.	

Test Analyst

12/2020 – 06/2023 | Noida

Empirical Solutions

- Develop and execute test plans, test cases, and test scripts based on software requirements and specifications.
- Perform various types of testing, such as functional testing, GUI Testing, retesting, regression testing, and integration testing.
- Identify, document, and track software defects and issues using bug tracking systems or tools.
- Participate in design reviews, requirement discussions, and provide input to improve software quality.
- Create and maintain test documentation, including test plans, test cases and test reports.

Education

MBA (65 %)

12/2022 – 12/2024

Indira Gandhi National Open University (IGNOU)

B. Com (61.62 %)

Projects

Century CRM

11/2021 – 05/2023

Century CRM enables users to efficiently organize, populate, and maintain information on all aspects of their customer relationships. It provides integrated management of corporate information on customer accounts and contacts, sales lead and opportunities, plus activities such as calls, meetings, and assigned tasks. The system also offers a graphical dashboard to track the sales pipeline, the most successful lead sources, and the month-by-month outcomes for opportunities in the pipeline.

iBilling

12/2020 – 10/2021

ibilling is a complete solution for managing Invoice and Billing operations. Invoice Manager helps you from raising an invoice to recording payment for the invoice and then finally providing a receipt from one app. Using Simple Invoice Manager, you can also record purchases and keep track of inventory. Further, you can record, and track Sales Orders Received as pending or fulfilled. The App will also help you generate profit and Loss reports. Generating invoices is simple and fast and you can create and send invoices immediately, track overdue invoices, and make sure to be paid for your invoice on time.

Financial Application

07/2023 – present

Worked primarily on testing activities including test case design, execution, defect reporting, and requirement validation. Assisted in creating and executing automation test scripts using Selenium WebDriver for functional and regression testing of a financial website. which helped reduce repetitive manual efforts.
