Objective

Motivated **AI Full Stack Developer** with hands-on experience in building scalable web applications using **React, Node.js, Express, MongoDB, PostgreSQL, and RESTful APIs**. Experienced in **UI/UX design, AI-driven data extraction, CRM integrations, workflow automation, and SEO optimization**. Passionate about delivering high-quality, user-centric solutions and eager to contribute to innovative, fast-paced engineering teams.

Education

Neil Gogte Institute Of Technology

B.E - Computer Science Engineering

2021 – 2025

CGPA: 7.87/10, Hyderabad

Narayana Junior College

Intermediate, TSBIIE

2019 – 2021

Percentage: 96%, Hyderabad

Narayana E-Techno School

Class 10th, SSC

2018 – 2019

CGPA: 9.8/10, Hyderabad

Experience

AI Full Stack Engineer Intern — Relai.World

Nov 2025 –Present

- Improved **UI/UX design** for the Relai website, enhancing usability and conversion-focused user flows.
- Built an **AI-powered web scraper** to extract, clean, and structure real-estate data from external platforms.
- Developed a **Customer Excellence Dashboard** with live **Zoho CRM integration** for actionable analytics.
- Automated **meeting scheduling** using the **Google Calendar API** to streamline workflows.
- Managed **structured and unstructured data** using **Supabase (PostgreSQL)** and **MongoDB**.
- Contributed to **SEO optimization**, improving search visibility and page performance.
- Created a **dynamic PDF Report Generator** for real-time, property-specific lead reports..

Skills

- **Programming Skills:** Java, JavaScript, Python, C
- **Web & Application Development:** React.js, Node.js, Express.js, HTML5, CSS3, Tailwind CSS, UI/UX Design
- **Backend Frameworks & APIs:** FastAPI, Flask, RESTful API Development
- **Databases:** MySQL, MongoDB, PostgreSQL
- **Version Control:** Git, GitHub
- **Deployment & Hosting:** Netlify, CI/CD, Web Application Deployment
- **Additional Skills:** Problem Solving, Object-Oriented Programming (OOP), Workflow Automation, API Integration

Projects

CureConnect: Web-Based Appointment Booking Application using MERN Stack

[GitHub](#) | [Demo](#)

- Designed a user-friendly interface using React.js to streamline browsing and booking doctor appointments.
- Built a backend with Express.js and Node.js for bookings, doctor management, and patient processing.
- Integrated the Razorpay payment gateway to securely process payments for appointments.
- Created an admin panel to efficiently manage doctors, appointments, and patient records.
- Implemented a doctor panel with appointment management, profile updates, and dashboard insights.

OutfitX: Online Store using MERN Stack

[GitHub](#) | [Demo](#)

- Designed and implemented a complete eCommerce website using the MERN stack.
- Developed the front-end with React.js for product display, shopping cart, and user authentication.
- Built back-end APIs with Express.js and Node.js for product and cart management, and user functionalities.
- Integrated MongoDB to store and retrieve dynamic product and user data efficiently.

Recognition & Accomplishments

- **Lumen Hackathon Quest** – Built an Inventory Management System (MERN) with stock tracking and analytics.
- **NephroPlus Hackathon** – Developed an OCR-based Lab Report Parser for structured medical data extraction.

Certifications

- Postman API Fundamentals Student Expert — [Link](#)
- Java HackerRank Certificate — [Link](#)
