- Node
- React
- JavaScript
- HTML5
- CSS3

SUMMARY

Detail-oriented technology graduate with a Bachelor's of Technology and a strong foundation in both front-end and back-end development. Proficient in HTML5, CSS3, and JavaScript, with additional expertise in frameworks such as React and Bootstrap. Skilled in programming languages including C , Python, and Node.js, equipped with experience in MySQL for database management. Committed to continuous learning and applying advanced programming techniques, I aim to leverage my diverse skill set in a dynamic development environment to contribute effectively to innovative projects.

PROFESSIONAL EXPERIENCE

DATA SCIENCE INTERN

NLP AI automation Pvt Ltd. Remote | Jan 2024 - Apr 2024

Assisted in analyzing large datasets using Python and R to extract insights and support decision-making processes. Collaborated with cross-functional teams to develop predictive models and visualizations, enhancing data-driven strategies. Engaged in data cleaning and preprocessing to ensure accuracy and reliability.

EDUCATION

BACHELOR'S OF TECHNOLOGY

Balaji institute of technology and science. Warangal | Sept 2020 - Jul 2024

Engaged in intensive coursework covering core engineering principles, software development, and system design. Developed problem-solving and analytical skills through team projects and assignments. Gained proficiency in programming languages, algorithms, and data structures, enhancing technical expertise and collaborative capabilities.

COURSES AND CERTIFICATES

HTML, CSS FRONTEND BOOTSTRAP

Udemy. Online | 2020

Completed a comprehensive course on HTML, CSS, and Bootstrap, focusing on creating responsive and visually appealing web interfaces. Acquired skills in structuring web content, applying styles, and utilizing Bootstrap components for streamlined development. Gained hands-on experience in front-end design and implementation best practices.

PROGRAMMING WITH C++

Udemy. Online | 2025

Developed a strong foundation in C programming through hands-on coding projects and exercises. Gained proficiency in object-oriented programming concepts, data structures, algorithms, and debugging techniques. Applied critical problem-solving skills to create efficient software solutions and improve programming logic.

JAVASCRIPT BEGINNER TO ADVANCED

Udemy. Online | 2025

Completed an extensive JavaScript course covering fundamentals to advanced topics, including data types, functions, and asynchronous programming. Engaged in hands-on projects to enhance problem-solving skills and develop interactive web applications, while gaining proficiency in using libraries and frameworks for enhanced functionality.

PROJECTS

INTERVIEWWIZ

AI mock Interviewer, course recommender and Career help |

Interviewiz is an AI-powered platform that offers personalized mock interviews, course recommendations, and career guidance to help individuals prepare for job interviews and advance their careers.

INSIGHTLY

AI powered news website |

Insightly is an AI-powered news website that provides users with personalized news summaries, leveraging artificial intelligence to aggregate and curate relevant content. The platform aims to deliver concise, informative, and engaging news experiences, helping users stay informed and up-to-date on current events and trends.

LEARNING MANAGEMENT SYSTEM - EDUSTAR

A Learning Management System (LMS) is a software platform that enables educators to create, manage, and deliver online courses, training programs, and educational content. The system includes key features such as course management, user management, content delivery, assessment and evaluation, tracking and reporting, and communication tools, aiming to provide an accessible, user-friendly, and efficient way to manage online learning and training.
