Dr. Mahalingam college of Engineering and technology

2019 - 2023

B.E(Computer science Engineering)

CERTIFICATIONS

- Build responsive real world websites with HTML and CSS - UDEMY
- Introduction to Database and SQL querying - UDEMY
- Developing Web Application using ReactJS - UDEMY

SKILLS

- Reactjs
- Java
- SQL

AREA OF INTEREST

- Web development
- Database Management
- Internet of Things

PROJECTS

Online Voting System

- Developed an online voting system catering to Non-Resident Indian (NRI) citizens, enabling them to cast votes remotely.
- Implemented a secure and user-friendly website allowing voters to participate in the electoral process online.
- Managed voter and candidate details within the system, ensuring efficient data handling.
- Facilitated voter login and utilization of voting rights through the platform.
- Prioritized high-security measures to safeguard the integrity of the voting process.

Hotel Booking Website

- Developed a responsive hotel booking website using React.js and React Router DOM for seamless page navigation.
- Designed reusable React components like Navbar, HotelCard, BookingForm, and Footer to improve scalability.
- Integrated dynamic hotel listings with images, price, description.
- Implemented booking functionality with forms for customer details and confirmation display
- Added Login, Register, and Profile pages with form validation for a complete user experience.
- Built 404 Error Page and protected routes for better UX and navigation control.

EXPERIENCE

Frontend Development intern @ Amypo Technologies

- During my internship, I learned React.js and developed my own portfolio.
- Implemented form validation, routing, and navigation using React Router and controlled components.
