## SUMMARY:

Backend Developer with over 1 year of experience in developing and maintaining robust web applications using Laravel and PHP. Proficient in building scalable backend architectures, integrating RESTful APIs, and managing databases with MySQL. Experienced in optimizing server-side performance, ensuring secure, maintainable codebases, and integrating dynamic frontend components using HTML, CSS, Bootstrap, and JavaScript.

## EDUCATION:

<b>BE-Information Science &amp; Engineering</b>	2019-2023
<i>Mangalore Institute of Technology &amp; Engineering, Moodabidri.</i>	CGPA-7.54

## TECHNICAL SKILLS:

LANGUAGES	: PYTHON, PHP, JAVASCRIPT.
DATABASE	: SQL, NoSQL.
INTERFACE	: HTML, CSS, BOOTSTRAP.
TOOLS	: Android Studio, Eclipse, PyCharm, VisualStudio Code, Sublime.

## INTERNSHIP:

**Accelerlab Solutions Pvt Ltd |Web Development**  
Projects: Educational Consultancy Management System.  
Languages: HTML, CSS, JAVASCRIPT, NoSQL.

Develop an educational portal where administrators can add and update courses, while users can browse and access the courses. Successful development of the educational portal, meeting project objectives. Administrators can effectively manage courses, while users have a seamless browsing and learning experience.

## WORK EXPERIENCE:

<b>Saanvi Technologies</b>	May 2024 – April 2025
<i>Trainee Software Engineer</i>	<i>Udupi</i>
<ul style="list-style-type: none"><li>Developed and maintained scalable web applications using PHP, Laravel, and MySQL.</li><li>Designed and integrated RESTful APIs for efficient backend–frontend communication.</li><li>Optimized application performance through clean backend logic and database query tuning.</li><li>Built responsive and interactive user interfaces using HTML, CSS, Bootstrap, and JavaScript.</li><li>Collaborated with cross-functional teams to deliver secure, maintainable, and user-friendly solutions.</li></ul>	

## PROJECT:

**Job Portal for Saanvi Technologies:** The Job Portal is a web-based platform developed for Saanvi Technologies using Laravel and enhanced with the Filament Admin Panel. It is designed to connect job seekers with employers by allowing users to register, log in, and apply for job openings. Companies can create accounts to post and manage job listings, view applications, and track candidate details. The admin panel, built with Filament, provides a user-friendly interface to manage users, jobs, roles, and permissions efficiently. The project uses MySQL as the database and follows the MVC architecture to ensure a clean and organized code structure. This job portal is ideal for showcasing end-to-end development using Laravel with a powerful admin interface.

**Happy Cars:** Developed a web-based car sales platform to manage buyers, sellers, and salespersons efficiently. Implemented features for listing cars, tracking sales, and managing customer interactions. Enabled sellers to post car details and manage inventory seamlessly. Integrated a buyer dashboard for viewing, filtering, and purchasing cars. Designed a salesperson portal to track sales performance and manage transactions.

**Employee Management System:** I worked on a project at Saanvi Technologies developed to manage employee-related information efficiently. This system handled core functionalities like employee profiles, leave management, attendance tracking, and department-wise categorization. It was designed to streamline HR operations and improve transparency and accessibility for both management and staff. The project included modules for adding and updating employee details, applying and approving leaves, and generating reports. I contributed to building backend functionalities using PHP and Laravel, integrating MySQL for database management, and ensuring secure data handling across the platform.
