

## Curriculum Vitae

Leena Arun Sontakke

Email ID : leenasontakke65@gmail.com

Mobile No. : 9356720289, 9130905708

### Objective: -

Highly motivated and detail-oriented Software Tester with two months of full-time experience in ensuring software quality through rigorous testing methodologies. Proven ability to identify and document defects, collaborate with development teams, and contribute to the delivery of high-quality software products. Eager to learn and expand testing skills in a challenging and rewarding environment.

### Experience: -

#### **Raacom infosystems Pvt. Ltd Hyderabad Telangana– Associate QA [4 Sept – 31 Oct]**

Executed various testing types, including functional, regression, sanity, smoke and UI testing to ensure software met specified requirements.

- Identified, documented, and tracked defects using Click up and excel sheet collaborating with developers to facilitate timely resolution.
- Developed and executed test cases based on user stories and functional specifications.
- Participated in Agile sprint planning, daily stand-ups, and retrospectives.

### Professional Summary: -

- Successful completion of software testing course from Avestan Technologies.
- Successful completion of 7 months software testing Internship on live projects from Avestan Technologies.
- Depth knowledge in SDLC (Software Development Life Cycle) and STLC (Software Test Life Cycle).
- Involved in Functional Testing, Smoke Testing, UI testing, regression testing, BVA and ECP
- Exposure on Test Case design against given requirements.
- Experience in executing test cases to the test application functionality against the requirement.
- Good experience in bug reporting and bug tracking process.
- Verifies the correctness of test steps and test data used during the test execution and raises concerns if any discrepancies are found.
- Good knowledge of core java.
- Good exposure on API testing
- Excellent communication skills demonstrate good attitude and listening skills, hardworking, result oriented.
- Effective team player and able to achieve common goals and business objectives.
- Ability to write and execute SQL queries to verify database content and perform database content and perform data validation

**Technical Skill: -**

Software Testing: Manual Testing, Functional testing, Requirement analysis, Test cases design, Test case execution, API testing, Postman, Defect reporting and tracking, sanity testing, smoke testing, Agile Methodology, JIRA

Language: Core Java

Database: SQL

Software/system: Windows

**Project work: -****Project 1: - Identable application**

**Description: -** Identable, a platform that empowers users to create, schedule, and automatically publish content on LinkedIn. Features include AI- content generation, automated post scheduling, and content performance tracking. Identable simplifies the process for users.

**Technologies used in project: -****Roles and responsibilities: -**

1. Review and analyze requirements documents (user stories, specifications) to understand the functionality and identify testable criteria.
2. Design and create detailed test cases covering positive, negative, and edge case scenarios.
3. Prioritize test cases based on risk and criticality and executing them
4. Perform various types of testing smoke testing, sanity testing, UI testing, regression testing and retesting
5. Document test results, including pass/fail status and any defects found.
6. Track and manage defects using a bug tracking system (Clickup)
7. Re-test resolved defects to verify fixes.

**Software Test Trainee Internship at Avestan Technologies**

Project details:

**Project 1: Binary Code Technologies**

**Tools used in project:** Manual test, excel for test case writing and bug reporting

**Technologies used:** Bootstrap, HTML, CSS

**Description:** Binary code technologies is platform where students can enroll themselves for any educational courses and can get information about the courses

**Role & Responsibilities:**

1. Understanding functional and nonfunctional requirements of the project
2. Writing & Executing Test Cases for a given module of software
3. As per requirements perform functional testing, UI testing, retesting on the given module. Perform sanity and smoke tests
4. Execute functional test cases
5. Defect reporting, retesting and regression testing of bugs
6. Involved in discussions with Dev Team project managers regarding requirement discussions, test cases and bugs.

7. Involved in test reporting
8. Cross browser testing

## **Project 2: Business listing website**

**Technologies used:** React.js, Node.js,

**Description:** It is a platform where business people can list their businesses or they can describe their business on this website it includes fitness, beauty, restaurants.
