

AMIT KOIRI

Java Full Stack Developer

I am a motivated Java Full Stack Developer with strong foundational skills in Java, Spring Boot, SQL, HTML, CSS, and JavaScript. I have hands-on experience building simple web applications using Spring Boot for backend development and HTML, CSS, and JavaScript for frontend design. I can create REST APIs, work with relational databases, and write clean, structured SQL queries. I focus on writing clean code, understanding core concepts, and developing user-friendly interfaces. I am eager to learn advanced tools and contribute to real-world projects in a collaborative environment.

Experience

○ [July, 2025] - Present

QSPider, Noida

Full-Stack Developer Intern

- Mastered full-stack development through intensive training in Java, Spring, SQL, HTML, CSS, and JavaScript.
- Good understanding of SOLID principles.
- Engineered dynamic and responsive front-end applications using React.js to create seamless user interfaces.
- Built and integrated robust back-end systems with Java and Spring Framework, managing databases with SQL.
- Developed and consumed RESTful APIs to ensure efficient communication between front-end and back-end services.

PROJECTS

Portfolio Website

[Link](#)

Full-Stack Developer | Personal Project | 2025 - Present

- Developed a modern, responsive portfolio showcasing skills, projects, and professional experience
- Implemented HTML5, CSS3, JavaScript with 25+ advanced animations and smooth scrolling
- Created mobile-first design with 100% responsive layout across all devices
- Integrated contact form with Formspree API for lead generation
- Built interactive timeline sections using Intersection Observer API for scroll-triggered animations
- Optimized performance to 98% Lighthouse score with WebP images and lazy loading
- Ensured WCAG 2.1 accessibility with ARIA landmarks and keyboard navigation
- Deployed on GitHub Pages with custom domain and Google Analytics tracking
- Created custom CSS variables for consistent theming across 15+ components
- Added popup modal system with backdrop blur and escape key support
- Implemented hamburger menu animation with CSS transforms and JS toggle
- Designed gradient text effects using CSS background-clip for brand identity
- Added 404 error page with fun animations and navigation breadcrumbs
