PROJECTS

TITLE: A SERVICE FRAME WORK FOR HATE SPEECH IDENTIFICATION ON SOCIAL MEDIA .

A **service framework for hate speech identification** on social media involves data collection, preprocessing, and feature extraction using word embeddings. It utilizes **CNN and SCCN models** for text classification, capturing local and semantic patterns. The trained model is deployed as an **API** for real-time detection and moderation. Continuous monitoring and retraining ensure improved accuracy over time.

TITLE: A STOCK PRICE PREDICTION MODEL BASED ON INVESTOR SENTIMENT AND OPTIMISED DEEP LEARNING .

A **stock price prediction model** using **LSTM and deep learning** integrates **investor sentiment analysis** from news and social media using **NLP techniques**. LSTM captures historical stock trends, while sentiment scores enhance predictions. The optimized deep learning model improves accuracy, aiding better investment decisions.
