Projects

Mobile Banking App

HTML, CSS, JavaScript, Java Spring Boot

- Developed a mobile-friendly banking UI with login, dashboard, quick actions, and transaction history using React.js and modern CSS.
- Built backend REST APIs in Java Spring Boot for authentication, balance retrieval, transaction history, and secure money transfers.
- Followed mobile- first design principles with reusable components for a smooth and intuitive user experience.
- Integrated frontend and backend seamlessly using REST architecture to ensure reliable and real-time data flow.

E-Commerce Website

HTML, CSS, JavaScript

- Built a fully responsive e-commerce website interface using HTML, CSS, and JavaScript with a clean and modern layout.
- Developed core features including product listing, product details page, add-to-cart functionality, and dynamic cart updates.
- Implemented client-side validations, interactive UI elements, and smooth navigation for an improved user experience.
- Focused on mobile- first design, reusable UI components, and optimized page performance for faster loading.

Certifications

- Responsive Web Design - Freecodecamp
- Java oops – Udemy
- Relational Databases & SQL -Udemy
