Soft Skills:Teamwork,Communication,Time Management,Leadership,Adaptability

Internships:

Java FullStack Intern-ExcelR

- A full stack developer is to create product from scratch and supervise the general flow of projects.
- I had worked as a full stack developer intern and I am responsible for web development on the client end and server end.
- Develop and maintain front-end web applications,back-end services.
- Designed and implemented APIs to ensure seamless communication between front-end and back-end components.

Projects:

Title:Book Shop Application

Technologies:Java,JDBC,Servlet,MySQL,Html,BootStrap

- We aim to develop a web application for registering and managing book details efficiently.
- Users enter book information through an HTML form, which is processed by a Java Servlet and stored in a MySQL database using JDBC.
- We implemented error handling to ensure data integrity and prevent invalid inputs.

Title:Simple Registration form using Html and Css

- Developed a simple web application utilizing HTML, CSS that allows users to sign up for a platform.
- The form should collect essential information like Full Name, Email Address, Date of Birth, Username, Password (ensure secure storage and handling) Contact Details like Phone Number, Address.

Training & Certifications:

- Java Full Stack Training in Jspiders
