HIRING PARTNERSHIP

Talent Support Brochure

Skillected.com by JSSAV Education Pvt. Ltd.

Talent Statistics Snapshot (as of July 2025)

Total Students Trained: 5,200+

At Skillected, we are proud to have trained over 5,200 students through our practical, industry-oriented programs. Our learners gain hands-on experience, real-world projects, and expert guidance to become job-ready professionals.

Industry-Ready Candidates Available: 1,000+

We currently have a pool of more than 1,000 skilled candidates actively seeking opportunities in tech and business roles. These individuals have been groomed with the latest tools, frameworks, and soft skills required by the industry.

Placement Drives Conducted: 80+

Skillected has organized and successfully executed over 80 placement drives in collaboration with companies across India. We ensure companies get access to pre-vetted, trained, and technically sound candidates.

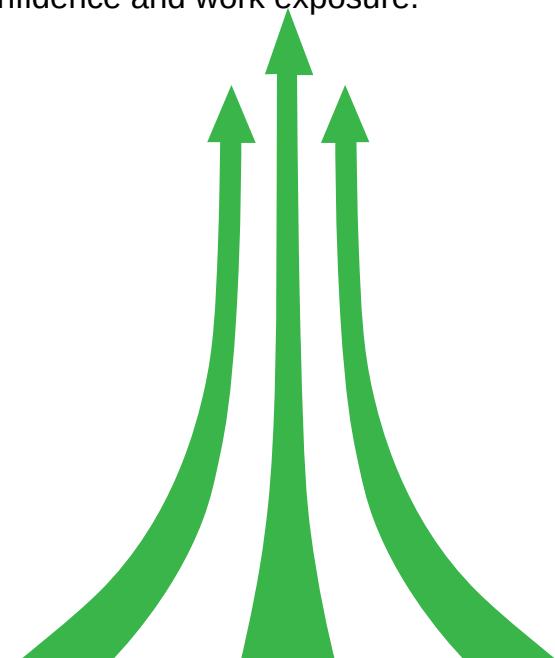

Hiring Partner Companies: 40+

With a growing network of 40+ hiring partners, Skillected bridges the gap between talent and opportunity. Our partners trust our training quality and regularly participate in our recruitment programs.

Internship Opportunities Facilitated: 200+

Internship experience is essential for growth. Skillected has facilitated over 200 internships with startups, MSMEs, and corporate firms to help our learners build confidence and work exposure.

Domains Covered

SERVICES OFFERED

Data Analytics

Data analytics tools can be broadly categorized into programming languages, data visualization tools, database query languages, and cloud platforms. Popular choices include Python, R, SQL, Tableau, Power BI, and various cloud services like AWS and Azure.

Share market & trading

following tools include price charts, volume indicators, moving averages, momentum indicators, pattern recognition, and support and resistance levels. Additionally, specific indicators like the Relative Strength Index (RSI), Moving Average Convergence Divergence (MACD), Stochastic Oscillator, Aroon Oscillator, are frequently employed.

Embedded System

Embedded systems tools can be organized into categories including editors, compilers, assemblers, debuggers, linkers, libraries, and simulators. These tools are essential for developing, testing, and deploying software for embedded devices

Each course combines theory with practical application, ensuring learners gain real-world experience and skills that set them apart in the job market.

How We Support Your Hiring Needs

Access to Pre-Trained, Job-Ready Talent:

We provide a strong pool of candidates trained in Full Stack Development, Data Science, DevOps, Digital Marketing, Cybersecurity, and Business Analytics.

Zero-Cost Hiring Collaboration:

Partner with us without any financial commitment. Our hiring support is designed to be seamless and budget-friendly.

Custom Training Aligned with Your Stack:

We train candidates based on your specific tech requirements and hiring goals, ensuring a perfect match for your team.

Internship-to-Hire Flexibility:

Hire through an internship model to evaluate real-time performance before offering full-time roles.

Soft Skills & HR Screening Support:

Every candidate goes through soft skills training and internal screening to ensure they are ready for client interaction and team fit.

Flexible Hiring Modes:

Choose from on-campus, virtual, or hybrid hiring setups as per your convenience and timelines.

7-Day Replacement Guarantee:

For fresher roles, we offer a 7-day replacement policy — ensuring hiring satisfaction and continuity.

Let me know if you want this tailored for a brochure, website, or pitch deck.

Training That Matches Industry Standards

Real-Time Projects & Hands-On Practice

Learners gain practical exposure through industry-relevant projects and tasks designed to simulate real work scenarios.

Mentor-Led Live Sessions with Assignments:

All sessions are conducted live by industry experts, coupled with regular assignments to reinforce learning.

Mock Interviews & Resume Preparation:

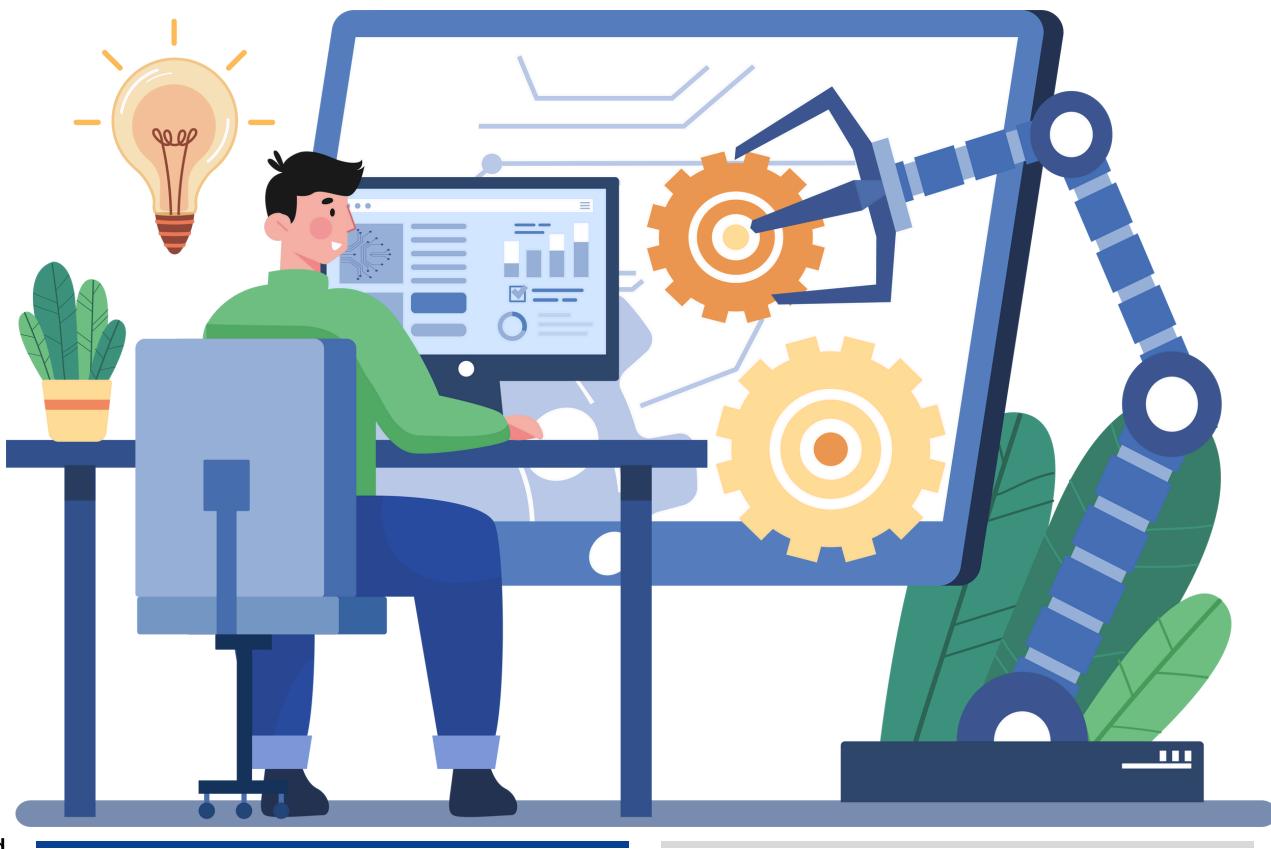

We prepare students for real-world hiring through mock interviews and personalized resume-building support.

Aptitude, Technical & Soft Skills Training:

Comprehensive training covers core aptitude, job-specific technical skills, and essential soft skills for all-round readiness.

Dedicated HR Mentorship for Placement Readiness:

Each candidate is guided by HR mentors to align them with hiring expectations and improve overall employability.

Our Hiring Process

Candidate Screening:

We carefully screen candidates from our trained talent pool based on your domain, role requirements, and experience level.

Aptitude Evaluation:

Each candidate undergoes aptitude assessments to test their problem-solving, logical reasoning, and analytical thinking.

JD-Based Shortlisting:

We match candidate profiles with your Job Description (JD) and shortlist only those who meet the technical and soft skill requirements

Initial Interviews by SkilledEcted:

Our team conducts the first round of interviews—both technical and HR—to assess communication, attitude, and job readiness.

Final Shortlist Submission:

You receive a curated list of pre-evaluated, job-ready candidates—streamlining your internal interview process and reducing hiring time.

Pre-Hiring Engagement Process:

Before we begin sharing candidates for your hiring needs, we follow a collaborative pre-hiring setup to align expectations and outcomes:

- ▶ Requirement Discussion: We connect with your HR or technical team to understand your hiring needs, team structure, and expected candidate profiles.
- ▶ JD Collection: You provide us with detailed job descriptions, required skillsets, experience levels, and hiring timelines.
- ▶ Candidate Volume & Mode: We agree on the number of profiles needed, expected timelines, and preferred mode of interview (virtual, offline, hybrid).
- ▶ NDA/MoU (If Required): For long-term collaboration, we can sign a non-disclosure agreement or MoU to establish smooth cooperation.

This pre-hiring stage ensures our talent delivery is fast, focused, and fully aligned with your recruitment expectations.

In-House LMS & Assessment Capability:

Skillected.com has its own Learning Management System (LMS) integrated with AI-enabled tools to evaluate students and professionals across multiple domains. As a hiring partner, you can leverage our LMS in the following ways:

- Conduct domain-specific tests designed as per your JD

- Run multiple rounds of screening before shortlisting

- Evaluate logical, aptitude, coding, and behavioral skills

- Share your own test format or allow us to customize it

- Track individual performance reports before interviews

Train-to-Hire: Tailored Talent Development for You

We understand that every company has unique hiring needs. At Skillected.com, we go one step further by offering personalized training paths aligned with your specific job roles.

➤ Here's how it works:

- You share your current or future talent requirements (skills, tech stacks, tools, etc.)
- We design a curriculum aligned with your job profiles and delivery timelines
- We upskill our selected batch of students or freshers accordingly
- After training and internal assessments, we share job-ready candidates with you
