Automation Testing

Cipla, Goa

New initiative taken to improve interaction between automation and manual team. Involved in complete testing life cycles including analysis, scenario design, test case writing and execution. Taken initiative to start with automation of workday application using selenium web-driver with IDE eclipse. Reading and writing data from MS excel. Used Maven for building POM framework which helped in better handling and maintenance of the code. Identifying and logging defect in HP ALM and provide status report to client on daily basis. Conducting knowledge sharing on regular basis for the team so as to understand the functionality and critical aspects of the application.
