

# RAHUL CHANDRAKESH KUSHWAHA

Mumbai, Maharashtra  
+917030580980 | 44rxhul@proton.me

## Objective

Motivated and detail-oriented Data Analyst passionate about using data to uncover trends and insights. Skilled in Python, SQL, Excel, and Power BI with hands-on experience in data cleaning, EDA, and visualization. Seeking an entry-level analyst role to apply analytical skills in solving business problems.

## Education

- |   |           |
|---|-----------|
| • <b>Datta Meghe College of Engineering</b><br>BE in Artificial Intelligence and Data Science<br>6.8 CGPA | 2021-2025 |
| • <b>KD College</b><br>HSC<br>86.17   | 2019-2021 |
| • <b>Carmel Convent High School</b><br>SSC<br>72.40   | 2019      |

## Skills

- Programming & Databases: Python, SQL (Postgre, MySQL), Excel
- Libraries: Pandas, NumPy, Matplotlib, Scikit-learn
- Visualization Tools: Power BI, Streamlit
- Data Analytics Techniques: Data Cleaning, Exploratory Data Analysis (EDA)
- Soft Skills: Documentation, Communication, Collaboration, Problem Solving

## Projects

- **Customer Trends Analysis**
  - Conducted a complete end-to-end analysis using Python, SQL, and Power BI to study customer purchasing behavior and product trends.
  - Queried and aggregated sales data using SQL, processed and cleaned it with Python, and visualized key KPIs in Power BI dashboards.
  - Delivered insights identifying top 3 customer segments driving repeat purchases and seasonal buying patterns.
- **Zomato Data Analysis**
  - Analyzed Zomato restaurant dataset using Python (Pandas, NumPy) to uncover insights on restaurant ratings, price range, and cuisine types.
  - Conducted data cleaning, EDA, and correlation analysis to understand customer preferences and market trends.
  - Identified top-performing cities and price segments based on average ratings.
- **Pizza Sales Data Analysis**
  - Analyzed a Pizza Store dataset (Kaggle) using SQL and Power BI to understand daily sales and popular products.
  - Cleaned and aggregated sales data to identify top-selling pizza types and peak order times.
  - Built visual reports in Power BI showing category-wise sales and revenue contribution.
