## PROJECTS

---

**LIFE LEDGER: BLOCKCHAIN POWERED ORGAN DOANATION:** The process begins with an Organ Donor Pledge, where individuals willing to donate their organs make a formal pledge. This pledge is securely registered on a blockchain server, ensuring transparency and reliability. Next, in the Recipient Registration stage, individuals in need of organ transplants register for the procedure, and their details are recorded. The Matching Donors and Recipients phase follows, during which the blockchain server efficiently matches donor data with recipient data. If a match is identified, the process moves forward. Finally, in the Transplantation stage, the recipient undergoes the procedure performed by the hospital transplantation team, completing the process.
