## Professional Summary:

---

- ✓ Overall **3.9+ years** of Professional experience in all phases of software development life cycle (**SDLC**) including requirements analysis, applications design, development, Integration, maintenance, installation, implementation and testing of various client/server and web applications.
- ✓ Experience in Development of Single Page Application using **Angular 12, JavaScript, TypeScript, HTML 5, CSS 3, Bootstrap 4** deployed on **Git**.
- ✓ Experience in developing Project Structures using **Angular CLI**
- ✓ Experience in development of **.Net Core** and **REST API's**.
- ✓ Experience on Handling queries on **SQL server** database
- ✓ Worked on **Jenkins** to Build **CI/CD Pipeline**.
- ✓ Experience in distributed version control system like **Git** using CMD & tools like **visual studio**.
- ✓ Experience in defect tracking tools like **JIRA**.
- ✓ Experience in testing including **debugging, error checking, browser compatibility** and **accessibility testing**
- ✓ Good Web Application **debugging skills** using **Chrome Developers Tool** and Visual Studio Code Debugger extension.
- ✓ Experienced with various IDE's such as **Visual Studio Code** and **Notepad++**.
- ✓ Strong technical and analytical knowledge and **problem identification and resolving skills**.
- ✓ Experience working in **AGILE** based development environment and participating in **Scrum** sessions

## Professional Experience:

---

### Full Stack Developer

Synechhron Pvt. Ltd | Nov 2022 to till date

- Developed responsive insurance onboarding forms using **Angular12, GhostDraft, and SQL Server**.
- Built dynamic UI components and CPMs to streamline user form flows.
- Implemented JSON-based form rendering and patching logic for underwriting tools.
- Collaborated in CI/CD pipelines using **Jenkins**, and version control via Git.
- Resolved cross-browser compatibility and performance issues.

### Software Test Engineer

SLP IT Services | Jan 2022 to Nov 2022

- Led manual and automated testing using **Selenium, Postman**, and various browsers.
- Created and executed test cases, and logged defects in **JIRA**.
- Ensured functional reliability and usability of international gaming platforms.

## Technical Skills:

---

- Frontend Languages : Reactjs, Angular 12, HTML 5, CSS, Bootstrap 4, TailwindCSS, KendoUI

- Scripting Languages : JavaScript, TypeScript, JSON
- Backend Languages : .Net Core, C#, Java
- Database : SQL Server
- Cloud Platform : Git
- DevOps Tools : Jenkins
- Development tools : Angular CLI, Visual Studio Code, Notepad++
- Database tools : Sql Server, MongoDB
- Git IDE : VS Code Git
- Debugging tools : Chrome Elements Inspector, VS Code Debugger
- Version Control : Git
- Operating Systems : Linux, Mac, Windows.
- Methodologies : Agile

## **Projects Summary:**

---

### **Project #1:**

**Title** : Market Forms Onboarding  
**Client** : Market Insurance  
**Role** : Full Stack Developer

**Project Description:** The goal of this project was to add insurance forms into the GhostDraft platform. This helped make the form process faster and easier for users. The work included creating forms that change based on user input, improving how the form look, and making sure everything was delivered on time.

**Technologies:** GhostDraft Studio/Workbench, Notepad++, Visual Studio, VS Code, Angular12, TypeScript, Bootstrap 4, Sql Server, Git.

### **Roles and Responsibilities:**

- Created Dynamic forms for insurance using GhostDraft.
- Took part in gathering requirements from the team and clients.
- Built CPM (Communication Process Models) to manage form flow.
- Made UI changes to improve the look and feel of the forms.
- Helped with development, testing, and form releases.
- Worked in a continuous release environment.
- Made sure all tasks and stories were delivered on time.

### **Project #2:**

**Title** : iRU  
**Client** : Market Corporate  
**Role** : Full Stack Developer

**Project Description:** This project was made to help with underwriting work. It is a web application built using Angular12 and .Net Core. The app allows users to create and manage forms easily.

**Technologies:** .Net Core, Angular12, TypeScript, Bootstrap, Sql Server, Git, KendoUI, Swagger, VS Studio, VS Code.

### **Roles and Responsibilities:**

- Created form builder that shows form UI from JSON.

- Helped in understanding project requirements.
- Built and updated te JSON mapping feature.
- Worked in a continuous release environment.
- Writing reusable, testable and efficient code.
- Implemented logic for patching values to dynamically build UI.
- Resolved team build issues.

### **Project #3:**

**Title** : API MarketPlace  
**Client** : Innovation Team Synechron  
**Role** : FrontEnd Developer

**Project Description:** This project was about creating responsive web pages for the API Marketplace. The goal was to make sure the pages look good and work well on all devices, like mobiles, tablets and computers.

**Technologies:** Reactjs, JavaScript, Bootstrap 4, TailwindCSS, Node JS, JSON Schema, VS Code.

### **Roles and Responsibilities:**

- Developed interactive UI using HTML, CSS, Reactjs.
- Built responsive web pages.
- Writing reusable, testable and efficient code.
- Involved in requirement gathering.
- Developed new approach.
- Experienced and worked on JSON Schema and JSON Schema validation.

### **Project #4:**

**Title** : Sandbox  
**Client** : Innovation Team Synechron  
**Role** : FrontEnd Developer

**Project Description:** This project was about creating latest and responsive web pages and managing data using Reactjs and TailwindCSS. The goal was to make the website look good and work well while handling data properly.

**Technologies:** Reactjs, JavaScript, Bootstrap 4, TailwindCSS, Node JS, JSON Schema, VS Code.

### **Roles and Responsibilities:**

- Developed interactive UI using HTML, CSS, Reactjs.
- Created a responsive website exclusive to different browsers and use media queries to handle responsiveness
- Implemented pagination, sorting and filtering.
- Built CRUD operations.
- Made the code cleaner and better.
- Helped in understanding what the project needs.

### **Project #5:**

**Title** : Dimitri  
**Client** : SLP IT Services, Netherlands Client  
**Role** : Software Test Engineer

**Project Description:** Worked as a Software Test Engineer for web forms and game testing projects. My main goal was to make sure the software worked correctly, was easy to use, and was delivered on time. I used both manual and automation testing methods.

**Technologies:** Windows 10, JIRA, Git, Selenium WebDrivers, Slack, Postman, API Testing, Browsers Chrome/Firefox/Safari/IE.

#### **Roles and Responsibilities:**

- Tested Software using manual and automation techniques.
- Planned and created test cases to check the software.
- Reported and tracked bugs and issues.
- Focused on checking software reliability and performance.
- Helped in regular project releases.

#### **Educational Qualification:**

---

- MBA. from Raarambapu Information Technology with 85.00%.
- B.TECH. in IT from Department Of Technology, Shivaji University Kolhapur, with 60.00%.
- Diploma in CS from Santkrupa Polytecnic Ghogaon, Karad, MSRTC with 57.00%.

#### **Personal Details:**

---

- Full Name : Vaibhav Sharad Shete
- Address : Hinjewadi, Pune
- Date of Birth : 9th Aug 1994.
- Gender : Male
- Nationality : Indian.
- Language Known : English, Hindi, Marathi.
- Marital Status : Married.
