Profile

Experienced Software Development Engineer with 3 years of expertise in designing and developing scalable enterprise applications across Healthcare, and Customs Clearance domains. Proficient in Java, Spring Boot, and Microservices, with strong database skills in MySQL . I am skilled in building high-performance, distributed systems using Kafka. ensuring robust and scalable deployments. Hands-on experience with JPA, GitHub, and CI/CD pipelines, contributing to efficient and maintainable software solutions. Passionate about solving complex problems and optimizing system performance.

Professional Experience

Techlene Software Solution Private Limited, Indore (M.P.) ▪ India

Software Development Engineer (Java)

01/2022 – 1/2025

Project:

Project name: Docdok.health

Duration: FEB 2023 - JAN 2025

Technologies used: Java, Spring Boot, Microservices, Maven, Jhipster, Docker

Description:

Docdok is a healthcare communication platform for patients and doctors. The platform integrates with the software used by doctors and medical devices used by patients. direct interaction between patients and their healthcare providers, allowing for disease education, symptom monitoring and patient coaching in a clinical setting.

Responsibilities and contribution:

- Responsible for requirement gathering and analysis
- I've been deeply involved in every phase of the software development lifecycle, from requirement gathering and system design to coding, testing, and deployment.
- Hands on development on all the modules.
- Handling the complete environments

Project: Qatar Custom Clearance

Duration: FEB 2022 - JAN 2023

Technologies used: J2EE, Spring , Hibernate, JSF , Mysql.

Description:

Implemented a streamlined Single Window System for trade data submission and regulatory compliance. Facilitated integration of e-Government platforms and coordinated with ministries, NGOs, and logistics stakeholders (importers/exporters, freight forwarders, shipping agents, transport operators). Enabled single-point electronic data access, reducing administrative burden and enhancing trade efficiency.

Responsibilities and contribution:

- Responsible for requirement gathering and analysis.□
- Responsible for analysis of alternate technologies and define the most fit technical□
- Led the migration of the existing Be code from JSF Framework to Spring Framework, improving performance and user experience.□
- Hands on development on all the modules.□

Technical Skills

| | |
|-------------------------------------|--|
| Back End | Java, Java 8, Spring Boot, Spring MVC, Hibernate, JPA, Microservices ,Jhipster |
| Database Technologies | MySQL, PostgreSQL |
| Front-End Technologies | HTML, CSS |
| Version Control | Git, GitHub |
| Testing Frameworks | Junit, Mockito ,swagger |
| Deployment & Build Tools | Docker, Jenkins CI/CD pipelines, Maven |
| Project Management Tool | Jira, GitHub |
| Cloud Platform | AWS (Basic proficiency) |
| Additional useful topics | Microservices Architecture ,Design patterns |

Soft Skills

Proven ability in effective communication, teamwork, problem-solving, adaptability, time management, attention to detail, creativity, professionalism, and continuous learning.

Education

Master of Computer Application (MCA) RGPV University, 2021

Bachelor of Computer Science (BSC) DAVV University, 2018-19

Achievements

- **Certificate of Best Performer of the Year (2022–2023)** for delivering high-quality software solutions on time and within scope.
- Certificate of Completion for the Technology Consulting Virtual Internship from WEB STEPPE, awarded on June 10, 2021.
