PROFESSIONAL EXPERIENCE:

React Native Developer

Accuster Pvt Ltd

Technologies: Spring Boot ,REST API ,VS Code ,Postman (API testing tool)

Description:

Developed mobile applications using React Native, integrating Spring Boot REST APIs for efficient backend communication, and contributing to UI development, bug fixing, and performance optimization in team environments. Integrated and consumed Spring Boot REST APIs for backend connectivity.

Key Features:

- Developed user-friendly mobile applications using React Native for Android/iOS.
- User authentication and session management (Login/Register)
- Integrated and consumed Spring Boot REST APIs for efficient data handling and backend connectivity.
- Admin panel to manage menu items, view orders, and update availability
- Optimized app performance with effective state management and API error handling.

RELEVANT PROJECTS:

Accuster Pvt Ltd

25/04/2024 -- 25/05/2025

Technologies: SpringBoot , PostMan ,Mysql

- Developed and maintained web applications using Java, Spring Boot, and MySQL.
- Worked on the Hospital Management System project, handling modules like patient registration, appointment scheduling, billing, and reports.
- Designed and implemented RESTful APIs for smooth communication between frontend and backend systems.
- Used JDBC and Hibernate for database interaction and optimized SQL queries for better performance.
- Developed dynamic web pages using Servlets, JSP, HTML, CSS, and JavaScript.
- Implemented role-based authentication and authorization to ensure secure access for different user roles.

- Performed debugging, testing, and bug fixing to ensure application stability and reliability.
- Prepared and maintained technical documentation for system design, modules, and APIs.

Email Send App

Project Description: Email Sending Application using Spring Boot that allows users to send automated or manual emails with attachments. The project was built to simplify internal and external communication for organizations through a secure and efficient mail delivery system.

- **Key Responsibilities:** Designed and implemented Spring Boot REST APIs for email sending functionality.
- Configured Spring Mail (JavaMailSender) to send plain text and HTML emails.
- Implemented support for attachments (PDF, Images, Documents) in emails.
- Developed a user interface with Thymeleaf for composing and sending emails
- Tested API endpoints using Postman for functionality and performance.
