9986191565 | [gurushantmatti15@gmail.com](mailto:gurushantmatti15@gmail.com) | <https://github.com/gurushantjmatti> | [www.linkedin.com/in/gurushantjmatti](https://www.linkedin.com/in/gurushantjmatti)

## Professional Summary

Full-stack developer experienced in building and shipping real-time and AI-integrated web applications. Proficient in API design, authentication, and prototyping.

## EDUCATION

**New Horizon College Of Engineering**  
BE - Computer Science Engineering (CGPA – 8.07)

Bengaluru, KA, IN  
Dec 2023 – May 2026

**KLS VPP**  
Diploma in computer Science(CGPA-9.45)

Belgaum, KA, IN  
May 2023

## TECHNICAL SKILLS

**Languages:** JavaScript, Java (OOP)

**Frontend:** React, Redux, Vite

**Backend:** Node.js, Express.js, REST API design

**Databases:** MongoDB, MySQL

**DevOps / Tools:** Git, Docker (basics), Postman, Render

## PROJECTS

### **Humora | Mood-based Music Recommendation App | React, Node.js, Express, MongoDB, Machine Learning**

- Integrated emotion detection model achieving ~85% emotion classification accuracy.
- Reduced initial load time by 40% using Vite.
- Designed secure APIs for playlist personalization; increased session duration by ~30% in tests.

### **PixelWhisper | Secure Authentication Backend | Node.js, Express.js, MongoDB, JWT**

- Delivered modular authentication service supporting multi-client integration (web + mobile).
- Enforced strong validation and hashed credentials, reducing security risks 100% vs. plaintext.
- Built fault-tolerant routing + retry logic, improving request reliability from dev tests by 25%.
- Designed API documentation enabling onboarding <15 min for new consumers.

### **NeuroSphere – Full Stack AI Chat Platform | React, Redux, Node.js, Express, Socket.io, MongoDB, Pinecone**

- Architected & deployed a real-time AI messaging platform handling 500+ socket events/minute.
- Improved search relevancy by 70% using Pinecone neural embeddings for semantic matching.
- Reduced API response latency by 35% through optimized request patterns and indexing.
- Implemented JWT access control + middleware to eliminate unauthorized access attempts.
- Deployed the full stack application on Render for reliable and scalable hosting.
