

Ishwar Namdev Dhaygude

Pune | Email Id:indhaygude07@gmail.com | +91 7498179424

IT student with hands-on experience in Java, JavaFX, Firebase Firestore, and Flutter. Skilled in building efficient systems and cross-platform applications, with strong proficiency in object-oriented programming principles. Experienced in mobile app development using Dart and Flutter.

Education

NBN Sinhgad Technical Institute Campus Pune BE in Information Technology	2021– 2025
• CGPA: 7.21	
Chatrapati Shivaji Maharaj Junior College Latur 12th	2020– 2021
• Percentage: 97.3	
Podar International School Latur 10th	2018-2019
• Percentage: 89.8	

Technical Experience

Programming Skills: Java, Object Oriented Programming

Web Technologies: HTML, CSS, JavaScript

Cloud Technologies: Amazon Web Services (EC2, AWS-ELB)

Database: MySQL, MongoDB.

Tools: Visual Studio Code, git

Projects:

Project 1:

Project:	Vroom (Showroom Management System)
Organization :	NBN Sinhgad Technical Institute, Pune
Location :	Pune
Environment :	Java, JavaFX, Firebase Firestore, OOP
Duration :	June'24 to Sept'24

Responsibilities:

- Developed a system to streamline showroom operations and improve workflow efficiency.
- Implemented modules for user registration, profile management, and secure handling of customer data.
- Built functionalities for appointment scheduling and automated invoice generation.
- Optimized backend processes to ensure efficient data management and enhanced system performance.

Project 2:

Project:	Library Management Project (learning based)
Organization :	NBN Sinhgad Technical Institute, Pune
Location :	Pune
Environment :	JavaFx, Firebase
Duration :	Dec'24 to Feb'25

Responsibilities:

- Developed a **console-based Library Management System** to streamline and automate library record handling.
- Implemented key **Core Java concepts**, including advanced JDBC operations, exception handling, inheritance, and polymorphism.
- Designed the application using strong **object-oriented programming (OOP) principles**, ensuring scalability, code reusability, and long-term maintainability.

Project 3:

Project:	WedWell (Wedding Planner App)
Organization :	NBN Sinhgad Technical Institute, Pune
Location :	Pune
Environment :	Dart, Flutter SDK, Firebase Authentication, Firestore Database
Duration :	Feb'25 to Mar'25

Responsibilities:

- Implemented **user management features** by developing secure login and signup APIs for seamless user onboarding.
- Developed a **cross-platform application** to manage vendor businesses and schedule wedding services efficiently.
- Designed and implemented **remote booking modules** for venues, photographers, caterers, and other wedding service providers.
- Built features for **wishlist management** and **booking history tracking** to improve user engagement and customer experience.
- Developed **vendor registration workflows** and comprehensive business management modules to simplify vendor onboarding and service customization.
- Collaborated in **testing and validation** of all custom components to ensure consistent functionality across platforms.
- Participated in **deployment activities**, supporting the release of new features and enhancements into production with minimal downtime.

Project 4:

Project:	Engineering college erp system
Organization :	IWD INFOTECH
Location :	Pune
Environment :	React.js, Node.js, PostgreSql,Css
Duration :	March'25 to Till Date

Responsibilities:

- Implemented **user authentication and authorization** by developing robust login and signup APIs.
- Developed a full-featured **web application to manage teacher and student records**, including intuitive, role-based dashboards.
- Designed and implemented **remote student assessment modules**, including mock interviews, assessment analyzers, and an attendance tracking system.
- Built an automated **blacklisted-student tracking module**, enabling the system to send alert emails to parents when required.
- Enabled seamless **parent–teacher communication** by integrating real-time chat and video-based interaction features.
- Developed **multi-role dashboards** and a scalable role-based access system, supporting different user types with custom signup and login flows.
