- UI Testing
- Java
- TestNG
- Web Driver
- Cucumber
- Postman
- Git
- Jira
- Agile
- STLC
- Functional Testing
- Non-functional Testing
- Requirement Traceability Matrix(RTM).

WORK EXPERIENCE

QA Engineer

Techno XO Private Limited

01/2025 - Present

Achievements/Tasks

- Developed automation testing scripts from scratch for platforms using **Selenium** and **Playwright** with Java, ensuring robust, scalable, and maintainable test frameworks.
- Performed **smoke** and **sanity testing** on web and mobile applications (iOS/Android) to ensure feature scalability, stability, and product integrity.
- Performed thorough **UAT** and **frontend testing** to ensure smooth production releases and quickly resolve critical issues.
- Executed **functional, integration, regression, UI, and compatibility testing** to validate application performance across different environments.
- Performed **API testing** using Postman for various HTTP methods to validate request-response workflows and ensure backend reliability.
- Provided QA sign-off, collaborated with teams, and prepared clear release notes to support successful deployments.
- Prepared comprehensive test documentation, including test plans and test cases, to ensure structured and effective testing.

Quality Analyst Intern

Misfits (FlexiFunnels)

09/2024 - 01/2025

Achievements/Tasks

- Conduct end-to-end, regression, and integration testing while managing the full testing lifecycle, including requirement analysis, test case development, execution, defect management, and automation feasibility assessment.

Quality Analyst Intern

StarAgile

06/2024 - 10/2024

Achievements/Tasks

- Proficient in test planning, execution, and defect reporting using JIRA, with expertise in QA methodologies, SDLC/STLC, testing techniques, and Agile/Scrum practices, including sprint planning and RTM maintenance.
