Professional Summary

Java Full Stack Developer with 2+ years of experience in designing, developing, and maintaining web-based applications. Proficient in Java, Angular, Spring Boot, and MySQL, with expertise in backend development, RESTful APIs, and secure system architecture. Experienced in Agile/Scrum environments, collaborating with cross-functional teams to deliver high-quality, scalable, and efficient software solutions. Strong problem-solving skills with a focus on clean, maintainable code and timely project delivery.

Technical Skills

- **Programming Languages:** Java, SQL
- **Frameworks & Libraries:** Angular, Spring Boot, Spring MVC, Hibernate, JPA, Microservices, React.js
- **Web & APIs:** RESTful API Development
- **Database:** MySQL, PostgreSQL, MongoDB
- **Tools & Platforms:** Maven, Git, JIRA, Eclipse/IntelliJ IDEA
- **Web Technologies:** HTML5, CSS3, TypeScript, Angular, jQuery, AJAX, JSON, XML
- **Methodologies:** Agile, Scrum
- **Other Skills:** Unit Testing, Debugging, Documentation, Security Implementation

Education

Bachelor of Technology (B. Tech)

DBATU University, 2022

Professional Experience

SOFREGO PRIVATE LIMITED | Aug 2023-Present

Project Title: MEDICA Healthcare

Role: Java Full Stack Developer

Project Description:

A web-based healthcare management system that streamlines hospital operations, enhances patient care, and ensures secure management of patient records, doctor appointments, billing, and medical histories. Implemented role-based authentication with Spring Security + JWT, enabling real-time access to doctors, patients, and administrators with strict compliance to healthcare standards.

Environment: Java, Spring Boot, Spring Security, JWT, Hibernate, MySQL, REST API, Apache Tomcat, Maven, Git, Angular, HTML, CSS

Key Responsibilities:

- Developed and maintained **RESTful APIs** using Spring Boot for patient registration, appointment scheduling, billing, and reporting.
- Implemented **Spring Security with JWT** for authentication and authorization (Admin, Doctor, Patient).
- Designed efficient **database interactions** using Hibernate ORM and optimized queries for performance.
- Built **Angular components** with HTML, CSS, and TypeScript for responsive UI.
- Integrated backend APIs with the frontend, ensuring smooth data flow.

- Deployed the application on **Apache Tomcat**, managed builds using **Maven**, and maintained source control with **Git**.
- Performed **unit testing** and collaborated with QA teams for integration testing.
- Followed **Agile/Scrum methodology** for task tracking, sprint planning, and progress reporting.
