## TECHNICAL SKILLS

---

**Languages** : Java, JavaScript.

**Styling/Libraries** : CSS3, Tailwind CSS, Bootstrap, React, Redux .

**Frameworks** : Spring , SpringBoot, Hibernate, Spring Data JPA, Spring Security, Express.js, Node.js.

**Databases** : MySQL, MongoDB.

## EXPERIENCE

---

### MERN Stack Developer - Intern

Aug 2025 – Oct 2025

*Sprintm technologies*

Hyderabad

- Developed a MERN-based hatchery management platform with role-based authentication (**JWT**), allowing farmers to upload fish-seed growth images every 10 days.
- Integrated **geolocation APIs** to automatically attach latitude/longitude with each upload, enabling admins to validate the submission's origin
- secure file handling using **Cloudinary** for image storage, optimized Express.js APIs.

### FrontEnd Intern

Jan 2025 – Jun 2025

*Galactix Solutions Pvt Ltd*

Hyderabad

- Contributed to the development of Telehealth, an online doctor–patient consultation platform, improving overall usability and workflow.
- Collaborated a team of 3 FrontEnd developers, to Develop and maintain scalable web applications using **React**, improving user engagement by 25%.
- Used Redux Toolkit for complex state management and collaborated with backend developers to integrate frontend components with RESTful APIs for seamless data flow and functionality

### Java Developer Intern

Aug 2024 – Nov 2024

*Audree Infotech Pvt Ltd*

Hyderabad

- Used **Spring framework** for efficient code organization and maintenance.
- Collaborated with senior developers to build RESTful APIs for LMS platform using **Spring Boot**
- Implemented Authentication features using **Spring Security**
- Optimized SQL queries to enhance database performance and reduce response time.
- Participated in code reviews and debugging sessions

## PROJECTS

---

### Task Management | MERN Stack

- Developed a **Kanban-style task management system** with Boards, Lists, and Cards for efficient workflow organization
- Implemented task categorization into columns such as "**To Do**," "**In Progress**," and "**Done**" to visualize progress clearly
- Integrated **Redux.js** for state management and used **createAsyncThunk** to handle API calls effectively
- Added **drag-and-drop functionality** using React DnD, enabling smooth task movement and list reordering

### FoodDonation web Application | MERN Stack

- Built a MERN stack food donation platform utilizing **React** for a responsive UI, **Node.js/Express** for backend APIs, and MongoDB for storing donor profiles, food items, and location data.
- Implemented secure user authentication and authorization using **JWT** and **bcrypt**, ensuring safe access for donors, volunteers, and admins.

## CERTIFICATES

---

**Mern stack :** Certification in full-stack development using MERN technologies

## EDUCATION

---

### VNRVJIET

Hyderabad, Telangana

*B.tech Computer Science*

Aug 2020 – May 2024
