## SUMMARY

Hands-on Java Backend Developer with 2+ years of experience in building scalable web applications using Java, Spring Boot, RESTful APIs, and SQL. Skilled in designing efficient backend systems, optimizing database performance, and writing clean, maintainable code. Strong team player experienced in Agile environments, dedicated to delivering high-quality, reliable solutions.

## EDUCATION

<b>B.E. in Computer Engineering</b>	2023
Savitribai Phule Pune University, Pune	83%
SITRC, Nashik	

## TECHNICAL SKILLS

**Backend Development:** Core Java, Java 8, Spring Boot, Spring Data JPA, RESTful APIs, Microservices, SQL

**Frontend Development:** HTML, CSS, JavaScript, Angular

**Tools:** Eclipse, Spring Tool Suite, Postman, MySQL Workbench, VS Code, GitHub, Swagger

## CERTIFICATIONS

- Java Development (CNC Web World, Pune) [Credentials](#)

## EXPERIENCE

**Aspire technology solutions pvt. ltd, Pune, Maharashtra: Java Backend Developer** July 2023 – Present

- Built RESTful APIs using Java, Spring Boot, and JPA for real-time applications.
- Performed API testing and documentation using Postman and Swagger.
- Optimized MySQL queries and managed database interactions in production environments.
- Improved backend performance through debugging and code refactoring.
- Collaborated in an Agile team with frontend developers to deliver integrated solutions on time.

## PROJECTS

### HRMS (Human Resource Management System)

- Designed and developed a web-based platform to manage employee records, payroll, attendance, leave tracking, recruitment, and compliance.
- Automated HR workflows to reduce manual tasks and improve processing speed, enabling real-time insights for better decision-making.
- Implemented performance tracking, document management, and automated notifications for contract renewals and compliance deadlines.
- Integrated role-based authentication for HR, managers, and employees to ensure secure data access.
- Built with a Spring Boot backend, MySQL database, and Angular frontend for a responsive and user-friendly interface.

### Garage Diary

- Developed backend modules for managing appointments, customers, and billing using Java 8, Spring Boot, Hibernate, and JPA
- Optimized database queries to reduce load times by 30%, improving overall performance and efficiency.
- Implemented JWT-based authentication and role-based access control for secure user permissions.
- Conducted comprehensive API testing using Postman to ensure data reliability across endpoints. Dockerized the application for seamless deployment, scalability, and consistent environment setup.
