Percentage : 90.06%

TECHNICAL SKILLS

- Programming language : Php, Python.
- Web technology : HTML,CSS.
- Database : Oracle SQL.
- Microsoft office automation tools : Ms word, Basic and Advanced Excel, Powerpoint , PowerBi.

PROJECT

Sports Gear (E-commerce shopping website)
We developed a user-friendly e-commerce website for selling sports equipment using PHP, MySQL, HTML, and CSS, where multiple users can register, log in, browse products, add items to the cart, and place orders with an offline payment (Cash on Delivery) option. An admin login panel is provided, where only the admin (with a hidden user ID and password) can manage product listings, update stock, and handle customer orders. The system ensures dynamic stock management and provides a responsive, interactive frontend for a smooth shopping experience.
