SUMMARY

Versatile technology professional experienced in developing, designing, and maintaining software solutions that meet business and client requirements. Adept at working in dynamic environments to deliver end-to-end solutions from analysis through implementation. Strong understanding of business drivers, with the ability to design, build, test, and configure applications while integrating automation, new functionalities, and emerging technology trends. Known for strong analytical and problem-solving skills, effective communication, and a proactive learning mindset, with a focus on delivering high-quality solutions on time and taking ownership of successful implementations.

EDUCATION

Bachelor of Engineering in Electronics and Communication Engineering   **2024**

Canara Engineering College   GPA: 7.6   Mangalore, India

TECHNICAL SKILLS

- Programming Languages: Python, SQL
- Data Analysis Tools: Power BI, Excel, Jupyter Notebook
- Libraries: Pandas, NumPy, Matplotlib, Seaborn
- Tools & Platforms: Git, GitHub, VS Code
- Reporting Tools: Power BI, Excel
- Database Management: Oracle SQL, SQL
- ETL Processes: Data Cleaning, Data Transformation

EXPERIENCE

Catalogue Executive   June 2025 – Present

Flipkart Internet Pvt. Ltd.   Bangalore, India

- Manage and validate large volumes of product and attribute data with a strong focus on accuracy, consistency, and completeness.
- Collaborated with cross-functional teams to analyze business requirements and ensure successful implementation of technology solutions while meeting time and quality expectations.
- Develop, design, and maintain technology solutions to improve client operations
- Analyze business requirements and build, test, and deploy applications
- Integrate automation solutions and emerging technologies into existing systems

Intern   August 2024 – May 2025

QSPIDERS CAMPUS CONNECT   *Bangalore, India*

- Analyzed data trends to support business decisions and identify opportunities.
- Assisted in developing reports using data visualization tools for clear insights.
- Collaborated with team members to gather and validate data from various sources.
- Worked in a dynamic environment to deliver end-to-end software solutions
- Designed and tested applications based on business requirements

PROJECTS

Power BI Analytics Dashboard Development   May 2024

Sales Analysis

Developed a Power BI analytics dashboard to track learning and development program performance, focusing on learner participation, completion trends, and behavioral patterns. Processed and cleaned data using Python (Pandas, NumPy) and structured it using Power Query to ensure accuracy and consistency. Built DAX-driven insights to identify trends, learning gaps, and support data-driven decision-making. Designed, built, and tested applications based on real-world business requirements. Implemented automation and integrated new features into existing systems.

CERTIFICATIONS

- INSPIRE AWARD -Department of science and Technology(DST),Government of INDIA
- Python for Data Science, AI, and Development -IBM, via Coursera
- Digital Signal Processing Issued by EPFL
- Data Analysis, PYSPIDERS Bangalore
