KHUBAIB AYUBI

Full Stack Developer (Node.js+ React)

📞 **+92 3374672001** @ **akbarayubikhubaib@gmail.com**

SUMMARY

Results-driven Full Stack Developer with **6+ years** of hands-on experience in designing, developing, and deploying scalable web applications using **Node.js** for backend development and **React** for frontend solutions. Proficient in building responsive, user-friendly interfaces and robust server-side logic, with a strong focus on performance optimization and clean code practices. Skilled in database management, **RESTful API integration**, and Agile methodologies. Passionate about leveraging cutting-edge technologies to deliver innovative solutions that align with business goals. Adept at collaborating with cross-functional teams to drive project success and continuously improve development processes

EXPERIENCE

Senior Front End Developer

Tech Cog pvt Limited

📅 2024 - Present   📍 Lahore, Pakistan

- Experienced **Senior Front-End Developer** with **6+ years** of expertise in building scalable, high-performance web applications . Currently associated with **Tech Cog Pvt Ltd**, where I have successfully led the end-to-end development of multiple enterprise-level applications, ensuring seamless integration, robust functionality, and exceptional user experiences.
- Designed and implemented **RESTful APIs** to integrate third-party services, enhancing system functionality and scalability
- Proficient in **Agile methodologies**, and **cloud-based deployments**, with a proven track record of delivering projects on time and within budget
- Played a key role in migrating legacy systems to modern frameworks, ensuring minimal downtime and improved maintainability.My projects which i have Delivered During this tensure is as follows:
- **PakHoardings.com:** A dynamic advertising management platform for outdoor media, enabling online booking and management of hoarding spaces
- **StatsBuiz ERP:** A comprehensive business analytics and enterprise resource planning solution designed to streamline operations and provide real-time insights.
- **Pokal.jp**: A scalable e-commerce platform tailored for the Japanese market, focusing on user experience and seamless transactions
- **Absher ERP**: An enterprise resource planning system developed to optimize business processes and enhance organizational efficiency.

Full Stack Developer

2B Vision Technologies

📅 2021 - 2024   📍 Texas City, United States

- At **2B Vision Technologies**, a leading software services company with a team of **300+ developers, This** company works for **TrueMedIT,** I contributed to the development of cutting-edge solutions for the healthcare industry, including **medical billing systems** and **HL7 integrations**. My primary responsibility involved modernizing legacy applications by migrating products from **WebForms** to **Node.js** and **Reactjs**, ensuring improved performance, scalability, and maintainability.
- Collaborated with cross-functional teams to ensure seamless integration of healthcare standards such as **HL7**, enabling smooth data exchange across medical systems.
- Developed and optimized **RESTful APIs** to facilitate communication between applications and third-party services, ensuring robust and scalable solutions.
- Improved application performance by **30%** through code refactoring, database optimization, and implementing caching mechanisms.
- Worked closely with UI/UX designers to create responsive and intuitive interfaces, resulting in a **20% increase in user engagement**

Front End Developer

Maima Soft

📅 2020 - 2021   📍 Lahore, Pakistan

- As a **Software Developer** at **Maima Soft**, I specialized in designing, developing, and maintaining robust web applications using **ASP.NET**. I collaborated with cross-functional teams to deliver high-quality software solutions that met client requirements and business objectives
- Developed and maintained scalable web applications using **Reactjs/Nextjs**, ensuring high performance, reliability, and security.
- Contributed to code reviews and followed best practices to maintain clean, maintainable, and reusable code.My projects which i have Delivered During this tensure is as follows
- **DPS School System:** Developed a comprehensive school management system using **Reactjs** to streamline administrative tasks, student records, and fee management.
- **Ticket Booking System:**Designed and built a scalable ticket booking platform for events and transportation, enabling seamless online reservations.
- **PSO Petrol Management System:** Developed a robust fuel management system for (PSO) to manage petrol station operations.
