Profile Summary

Experienced Software Engineer with a foundation in Core Java, Java 8. Spring boot, Spring JPA and Microservices. Skilled in building robust applications and maintain microservices for efficient business implementations. Proficient in API development. Excels in utilising tools such as Git, Postman.

Experience

- **Perfios , Mumbai**   May 2023 - March 2025
  Software Engineer
  - **Designed and developed** microservices using **Groovy & Grails, integrating with Spring Boot services**.
  - **Developed and maintained** modules for customer onboarding and credit card products **using Groovy and Grails.**
  - Implemented **dynamic field encryption using Jasypt,** ensuring sensitive data is stored securely in the database while remaining readable on the UI.
  - Built reusable **JSP templates** or **GSP templates, tag libraries**, and integrated jQuery for dynamic dropdowns and modal data loading.
  - **Developed** APIs to **integrate with third-party services** and handled responses in **JSON format**.
  - **Developed** the karza api response feature which will show on admin side.
  - Worked on real-time **document analysis, including bank statements, ITRs, esign portal,** etc.
  - **Contributed** in code have **migration** from **monolithic grails application to spring boot microservices** based application.
  - **Debugging** and **troubleshooting** Production and UAT issue.
  - Supported the **migration** of legacy **Java modules into Groovy-based microservices.**
  - Collaborated with cross-functional teams to resolve production issues and provided ongoing **technical support, ensuring optimal performance of deployed applications.**

- **Bridgelabz Solutions, Mumbai**   Feb 2023 - May 2023
  Software Engineer Intern
  - Acquired Skill in **Linux commands, shell scripting** ,learned **Java Programming** from basic to advance.
  - Developed many small medium and large scale projects to get hands on **java and spingboot**.
  - Enhanced user experience through the development of intuitive user interfaces using **HTML, CSS,** and **JavaScript**.
  - **Developed full-stack** web applications using **Angular** for the frontend and **Spring Boot** for the backend, including a User Management System and Employee Payroll System, ensuring a seamless user experience.
  - **Created RESTful APIs with Spring Boot,** supporting dynamic front-end functionality and ensuring smooth communication between client and server.
  - Managed **databases** with **MySQL**, writing and **optimizing complex SQL queries**, stored procedures, and triggers to ensure efficient data handling.
  - **Collaborated** with team members using **Git** for version control, resolving merge conflicts, and participating in **code reviews to ensure clean, maintainable code.**

- **THE LEAD MARKET(TLM) , Nagpur**   Jan 2022 - Feb 2023
  Market Research Executive
  This is **B2B lead generation marketing company,**we focusing on lead generation and appointment setting services. As a **market research analyst** my role is to collecting and analyzing effective data from various platform which will be beneficial
  for the lead generation.

Education

- **Priyadarshini J. L. College of Engineering**   2020
  Bachelor of Engineering

Projects

- **Name : Integrate Product : Credit card**
  Developed a lending application for banks to streamline loan processing and customer onboarding for various loan types, including home loans, vehicle loans, personal loans, and credit cards.
  The project utilized with use of **Spring Boot, Angular, Grails, and Groovy** to ensure rapid development, scalability, and maintainability. Designed a custom UI using **Angular and tag libraries in GSP or JSP** to enhance reusability and improve development efficiency. Build robust APIs with **Java Spring Boot and Groovy within Grails**, enabling seamless third-party integrations. Leveraged **Grails' ORM (GORM)** for efficient database operations, optimizing queries to maintain high performance under load.

Skills

- Programming languages: Java, Groovy.
- Frameworks: Spring boot, Grails
- ORM: Hibernate
- RDBMS: Oracle Database, MySQL, Mongodb ,Redis
- Tools: GIT, Intellij Idea, Postman, Gradle,Mavan
- OS: Linux,Windows
- Code debugging
- Logs checking on terminal
- Api Migration , Api Integration
- Bootstrap (HTML, CSS, javascript), Jsp ,Gsp
- JQuery , Junit
- Messaging & queuing : Kafka
- CI/CD pipeline : Jenkins
