Dear Hiring Manager,

I am writing to express my interest in opportunities within the data analysis domain. With a solid foundation in Python, MySQL, Power BI, and Azure ML, I have honed my skills in data extraction, visualization, and machine learning, enabling me to deliver actionable insights that drive business impact. My experience as a Technology Trainee at the National Stock Exchange has equipped me with the ability to resolve client issues efficiently while leveraging data to inform strategic decisions.

Completed Bachelor of Technology in Chemical Engineering at National Institute of Technology, Warangal, graduating in 2025.

During my internship at IQuantela Technologies, I successfully deployed machine learning pipelines and enhanced data collection processes using Python libraries. My personal projects, including a neural network for predicting customer churn and a Power BI dashboard for data professionals, showcase my ability to apply theoretical knowledge to real-world challenges, achieving significant improvements in accuracy and operational efficiency.

I am particularly drawn to roles that allow me to utilise my analytical skills and technical expertise to contribute to data-driven decision-making. I am confident that my proactive approach and problem-solving abilities will make a valuable addition to your team.

Thank you for considering my application. I look forward to the opportunity to discuss how I can contribute to your organisation.

Sincerely,
Challapalli Sundara Aditya
