RAJ B. NARULE

Address: Karla Road, Wardha 442001 | **Mob No.** +91-7414916926 | **Email:** rbnarule2002@gmail.com

LinkedIn: www.linkedin.com/in/raj-narule-279117251

SUMMARY

Graduate engineer in Artificial Intelligence & Data Science, currently pursuing PG-Diploma in Advanced Computing (PG-DAC) at C-DAC Hyderabad. Strong foundation in programming, problem-solving, and data-driven technologies, with a keen interest in software development and emerging technologies. Motivated to apply technical skills, learn continuously, and contribute effectively in a professional IT environment.

EDUCATION

Bachelor of Technology (B. Tech) AI and Data Science   **2021-2025**
Wainganga College of Engineering and Management

HSC 12th   **2020-2021**
Shri Vyankatesh Polytechnic

SSC 10th   **2018-2019**
Channawar's e Vidya Mandir

SKILLS

Languages: Java, C, C++, JavaScript
Frontend: HTML, CSS, React (Basic)
Backend: Advanced Java, Spring Boot , .NET
Database: SQL
Tools: Git, visual Studio, VS Code, Eclipse, IntelliJ Idea, Postman
Soft Skills: Problem-solving, Teamwork, Communication, Quick learner, Hard Working, Time management.
Language: English, Hindi, Marathi.

PROFESSIONAL EXPERIENCE

- **Brillect Tech Solutions Pvt. Ltd. | Internship in Python**
  Mar 2023- May 2023
  Successful completion of 02 months Python Internship at Brillect Tech Solutions Pvt. Ltd. The Internship included training and focused primarily on learning and developing new skills. And also gaining a deeper understanding of concepts.

PROJECTS

- **Gas Leakage Detection and Alerting System**

  Designed and implemented a gas leakage detection system using gas sensors to monitor harmful gas levels in real time. The system activates an alarm when gas concentration exceeds a predefined threshold, improving safety by providing early warning and preventing potential accidents.

- **Heart Disease Prediction using ML**

  Developed an AI-based system to predict heart disease by analyzing ECG images using image processing and machine learning techniques. The system extracts signals from 12-lead ECG images and classifies cardiac conditions such as normal, abnormal heartbeat, and myocardial infarction. A web-based interface enables real-time prediction, supporting early diagnosis and remote healthcare accessibility.

- **Freelancer Hub (Ongoing)**

  A full-stack web application connecting freelancers and clients, featuring separate login/signup for each, secure backend services with Java and Spring Boot, a responsive frontend with HTML, CSS, JavaScript, and React, and SQL-based data management. It includes authentication, role-based access, and database integration to simulate a real-world freelancing platform and enhance full-stack development skills.

CERTIFICATIONS

- Java Programming Certification - Disha Computer, 2024
- Internship Completion Certificate - Brillect Tech Solutions Pvt. Ltd, 2023
- Participation in International Conference - International Conference on Innovation in Engineering, Science and Management (ICIESM-2K25), 2025
