Summary

Passionate software developer and Linux administrator with 8 months of software development experience and 1 year of Linux administration experience. System Administrator / Linux and Cloud Engineer with hands-on experience in server deployment, configuration, diagnostics, and troubleshooting across Linux and Windows environments. Skilled in **system administration, virtualization (VMware)**, and **cloud platforms (AWS)**. Proficient in **infrastructure automation and CI/CD practices using Ansible, Terraform Jenkins, Kubernetes, Git, and GitHub** Actions for system automation and performance tuning. Experienced in **Active Directory, DNS, DHCP, and Group Policy** for identity and access management, along with **patch management, and system backups/restoration procedures**. Demonstrated expertise in networking protocols **(TCP/IP, DHCP, VLANs, NFS, FTP, HTTP, SSH),** monitoring tools **(Prometheus, Grafana, Nagios),** and hardware/software troubleshooting. Adept at maintaining **physical and virtual servers**, and ensuring **system security, scalability, and uptime**. Recognized as a **highly motivated team player** with excellent **analytical, debugging, communication, and technical support skills**, capable of delivering efficient IT solutions in fast-paced, dynamic environments.

Skills

- Operating systems: Linux (Red Hat, Ubuntu), Windows Server
- Virtualization and cloud: VMware, AWS
- Automation and CI/CD: Ansible, Terraform Jenkins, Kubernetes, Git, and GitHub Actions
- Networking: TCP/IP, DNS, DHCP, VLANs, routing, firewalls, NFS, HTTP, SSH
- Monitoring tools: Prometheus, Grafana, Nagios
- System administration: Active Directory, Group Policy, patch management, backup, and restore
- Security and compliance: IAM updates
- Soft skills: analytical thinking, troubleshooting, team collaboration, communication

Experience

Linux Administrator | CDAC - Pune | 10/2024 - 10/2025

- Managed server infrastructure to ensure continuous uptime and optimized performance.
- Diagnosed and resolved server issues by analyzing log files and improving system reliability.
- Led a team to ensure timely project delivery and high-quality outcomes.
- Coordinated exams, ensuring compliance, and smooth execution across multiple locations.
- Successfully conducted and managed Agniveer, Agniveer-Vayu, and Indian Coast Guard (ICG) examinations, overseeing the entire center's operations in multiple cities, such as Mumbai, Jaipur, Delhi, and Nashik.
- Ensured compliance with exam protocols, and smooth execution from planning to completion.

Software Developer | Banktech Solutions - Pune, India | 10/2022 - 06/2023

- Developed and aligned a responsive, user-friendly website for a U.S. banking client, ensuring consistent branding through effective CSS styling.
- Integrated and optimized multimedia elements, including videos and images, to enhance user engagement and cross-device compatibility.
- Designed intuitive navigation flows and interactive menus to improve accessibility, and seamless page transitions.
- Deployed the website on GitHub Pages and managed version control using Git, supporting continuous integration and collaborative development.

Education and Training

CDAC | Pashan, Pune | 08/2024

PG Diploma: HPCSA, Percentage: 75%

Gokhale Education Society | Nashik | 08/2022

B.E.: Computer Engineering, CGPA: 8.74

K. K. Wagh Women's Polytechnic | Nashik | 07/2019

Diploma: Computer Engineering, Percentage: 75%
