Responsibilities and Achievements:

- Assisted in day-to-day operations
- Coordinated with team members for smooth workflow
- Maintained reports and documentation
- Contributed effectively to organizational objectives

Companies Directory – Frontend Development   [PROJECT]

A companies directory frontend can be built using modern frameworks such as React, Angular, Vue.js, and Next.js, which are popular choices for scalable and responsive web apps in 2025. Leading development companies have successfully delivered directory and dashboard solutions for various industries using these technologies.

Modern frontends use design tools like Figma for collaborative UI/UX, and VS Code for smart coding environments. Data integration typically relies on APIs and headless CMS for flexibility and scalability.

For a robust companies directory, combining an appropriate framework, expert frontend company, and modern design/integration tools is key to delivering a performant, user-friendly solution.

Technology uses

- React.js, JavaScript , HTML, CSS
- State management: React Hooks (useState, useEffect), Context API, Redux
- Responsive UI design: Material-UI, Bootstrap
- API integration: Axios, Fetch
- Version control: Git, GitHub (repository management, code reviews, branching)
- UI/UX collaboration: Figma
- Developed a responsive companies directory UI in React.js, utilizing Material-UI components for card and

table layouts, ensuring a seamless user experience on all devices.Implemented advanced filtering controls (dropdowns, search inputs) to allow sorting and searching by company name, location, and industry.

- Managed application state effectively using React Hooks and Context API (scaling to Redux for larger state needs), including detailed loading and error states.
- Integrated with backend APIs using Axios, providing real-time updates and robust error handling.
- Utilized Git for version control and GitHub for repository management, code reviews, and collaborative development, maintaining a clean and documented project history.
- Collaborated closely with UI designers via Figma to ensure accurate translation of designs into a functional, accessible product.
