PROJECTS / OPEN-SOURCE

Stock Photo Generator | Link — *Java, Spring Boot, Spring AI, React.js*
Built an AI-based Stock Photo Generator using Spring Boot and Spring AI, developing Java REST APIs and deploying it on scalable cloud infrastructure, showcasing my ability to blend machine learning with robust backend development.

Car Rental Website | Link — *HTML, CSS, JavaScript*
This is a car rental website where users can easily search for cars, check out detailed listings, and book their vehicle. Built using HTML, CSS, and JavaScript, the site offers a smooth, mobile-friendly experience with dynamic features and real-time availability, making it simple and intuitive to use across all devices.

Smart Contact Manager | Link — *Java, Spring Boot, Tailwind CSS, Hibernate, MySQL, Thymleaf*
A web application to efficiently manage contacts, track communications, and set reminders. Features include secure contact storage, data enrichment for insights, and automated follow-ups. With an intuitive, user-friendly interface, the platform streamlines contact management and enhances productivity for users, ensuring seamless and organized communication.
