SKILLS

- MS SQL SERVER
- T-SQL
- PL-SQL
- STORED PROCEDURES
- POSTMAN
- POWER BI
- TABLEAU
- QUERY OPTIMAIZATION
- MY SQL

LANGUAGES

- English
- Hindi
- Marathi

PROFILES

- Hackerank
- Linkdin
- Git

PROFILE

Skilled Database Developer with strong experience in designing, developing, and optimising relational and NoSQL databases. Proficient in SQL, data modelling, performance tuning, and ETL processes. Adept at ensuring data integrity, scalability, and supporting business applications.

WORK EXPERIENCE

Heckyl Technologies Pvt Ltd.
JAN 2024 - APR 2025
Database Developer

Developed and implemented database solutions aligned with project and business objectives.
Led database-related tasks within cross-functional teams, ensuring efficient data flow and system integration.
Maintained data accuracy and consistency across platforms while optimizing query performance.

BIYANI TECHNOLOGY
AUG 2022 - NOV 2024
Database Developer

Assisted in managing and monitoring databases to ensure performance, security, and data integrity.
Supported routine tasks like backups, restores, and user access management.
Helped analyze database performance and suggested basic optimizations under senior DBA guidance.

Spark Lab IT Solution
SEP 21 - DEC 2021
Web Designer intern

Collaborated with cross-functional teams and external partners to support web design projects and ensure brand consistency.
Assisted in designing and updating website elements across platforms, maintaining visual identity and user experience standards.

EDUCATION

Bachelor OfEngineering.
SGMCOE,KOLHAPUR | SHIVAJI University
2017 - 2022
GPA: 7.8 / 10

Higher Secondary School.
N.B.PATIL JUNIOR COLLEGE | Maharashtra Board
2016 - 2017
GPA: 6.1/ 10

PROJECTS

HDFC PRO TERMINAL TRADING PLATFORM
JAN2024-APL2025

Client: HDFC Bank **Description:** Contributed to developing HDFC's trading platform aimed at providing real-time trading features, market insights, and seamless account management for users. **Tech Stack:** MS SQL Server, .NET APIs, Postman **Key Roles and Responsibilities:** Designed, managed, and optimized MS SQL Server databases to support trading data, user transactions, and account details. Developed stored procedures, triggers, and views to streamline data operations and maintain data consistency. Collaborated with backend/API teams to ensure efficient data handling and smooth integration with .NET-based APIs. Used Postman for testing and validating API endpoints connected to the database. Handled data troubleshooting, query optimization, and performance tuning to support high-volume financial transactionst

KOTAK SECURITIES TRADING PLATFORM
JANUARY 2024 – SEPTEMBER 2024

Client: Kotak Bank**Description:**Contributed to the development of a secure and scalable trading platform for Kotak Securities, enabling real-time portfolio tracking, trade execution, and user account management. **Tech Stack:** MS SQL Server, .NET APIs, Postman **Key Roles and Responsibilities:** Designed and managed relational database schemas for user portfolios, trade transactions, and market data. Developed stored procedures, functions, and views to handle complex financial logic and real-time data processing. Collaborated with backend/API teams to ensure efficient data exchange and high-performance query execution. Performed query optimization and indexing strategies to improve response time for high-volume trading operations. Ensured data integrity, security, and compliance with financial standards and internal audit requirements. Used Postman for API testing and validating database interactions within .NET-based services

ABML TRADING PLATFORM
JAN 2024 – MAR 2025

Client: ABML **Description:** Worked on ABML (Aditya Birla Money Limited), aimed at enabling seamless trading, order execution, and portfolio tracking for retail and institutional investors. **Tech Stack:** MS SQL Server, .NET AP Postman **Key Roles and Responsibilities:** Designed and maintained SQL Server database structures for orders, trades, user portfolios, and market data. Created optimized stored procedures, views, and triggers for processing high-frequency trading data. Collaborated with backend teams to support .NET API integration, ensuring efficien and secure data transactions. Conducted query performance tuning and implemented indexing strategies to enhance system performance. Ensured data accuracy, integrity, and compliance with financial and regulatory requirements. Used Postman for testing API endpoints and verifying database interactions
